Backend Information x

Setting Up a New Company

Setting up a new company is a simple process, but you want to make sure everything works properly.

Step 1: Choosing Your Features

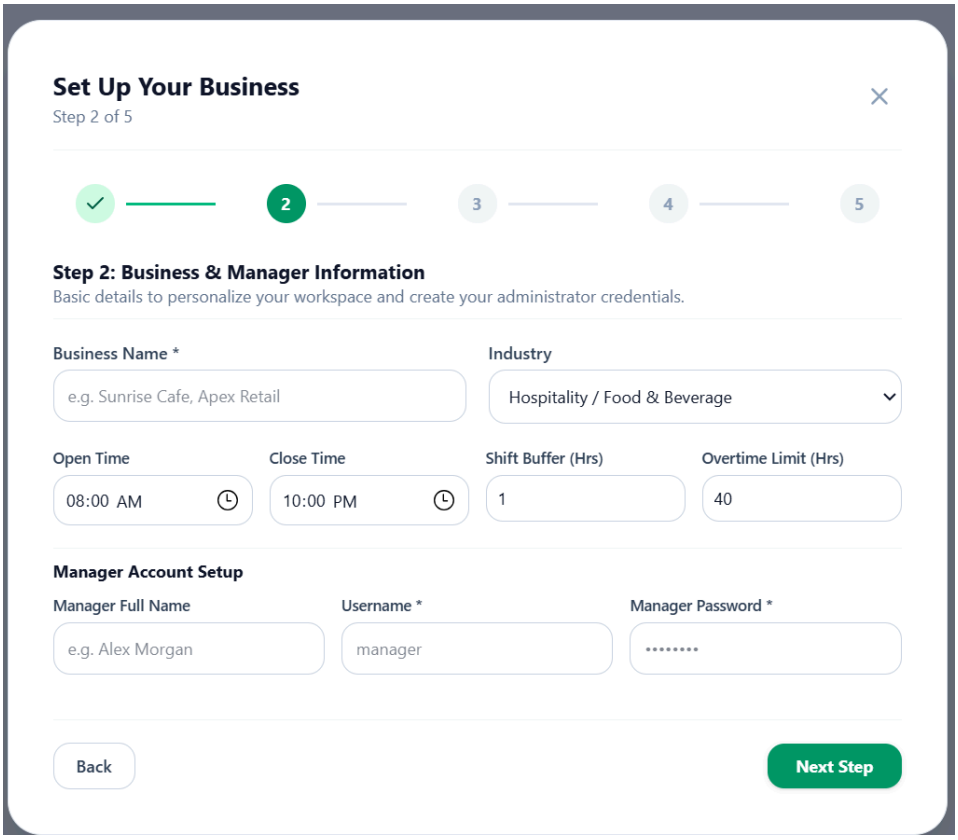

1. **AI Scheduling & Forecast Insights:** When turned on with a free API key, the AI reviews your business data (like past schedules, sales, and custom uploaded files). When you click any option in the AI section, it gives you smart recommendations—and you decide whether or not to apply them.
2. **Timeclock Mode:** Timeclock mode gives employers the option to choose how they want their employees to clock in.

a. Mobile + Kiosk: This allows the employee to clock in when they are in range of the business, but if they are outside of the range of the business, they can put in their 4-digit PIN at a kiosk terminal the company sets up (like an iPad or Android tablet).
b. Kiosk Only: When the manager adds employees they each get a 4 digit code, kiosk mode lets employees input their code to clock in/out at a central kiosk instead of anything on there phones.
c. Mobile Only: This option allows employees to clock in only on their phones. WARNING: If the GPS is saying that the employees location is too far, the employer must either expand the gps perimeter, or manually add the hours after the fact.

3. **Track Hourly Pay & Labor Budget:** This toggle switch allows for managers to have a bar that tracks the estimated total labor costs, overtime hours, and set a weekly labor budget.

Step 2: Business Info

This section of setup is where you will fill out the specifics of your business. Each section has an important aspect for future note:

Business Name: This section is for how you want the name of your business to be recorded and displayed around the site.

Industry: This is just to select the type of industry, it has no bearing on the creation of the business profile.

Open/Close Time: This is actually where you might put working hours from when the normal first staff might enter, to the last staff leaving. Scheduling staff more then the *buffer hours* outside of this window will only cause a small notification that can be dismissed.

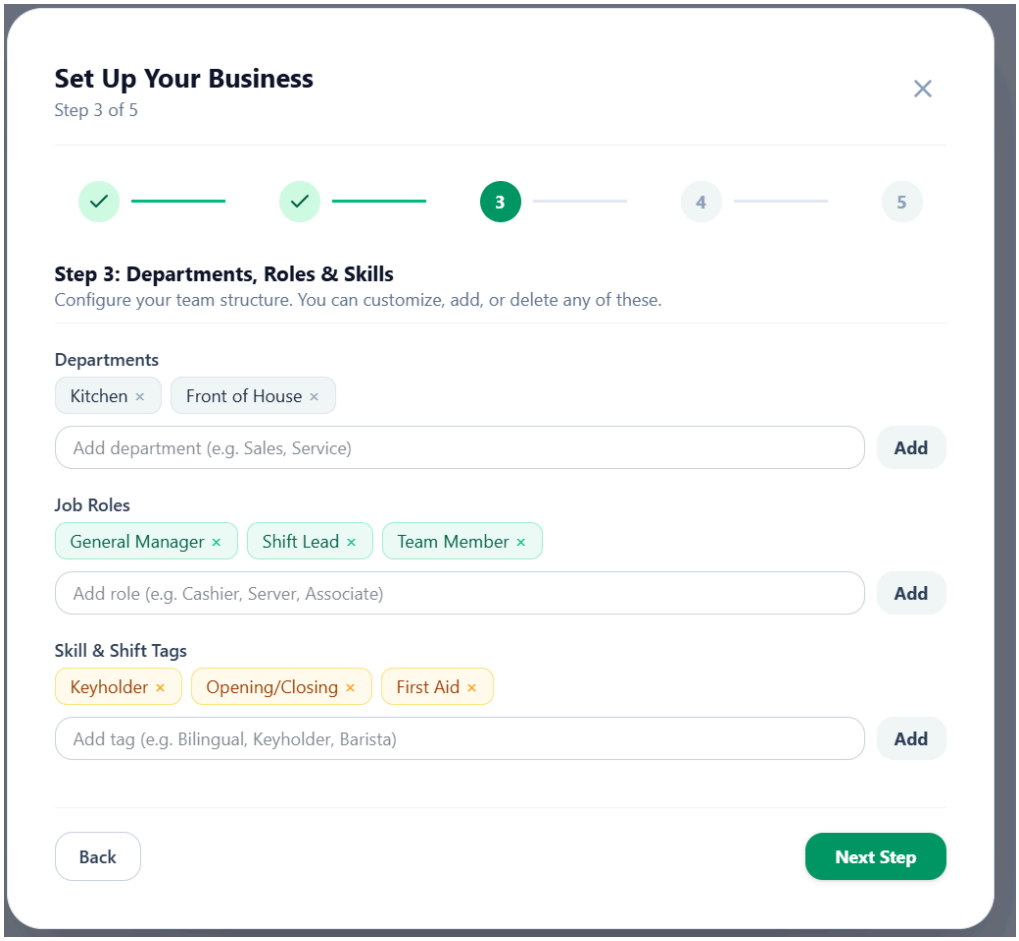

Buffer Hours: This is the amount of hours before and after closing time that employees can be scheduled without a warning.

Overtime Limit: This is the amount of hours an employee must have for a week before it starts counting overtime.

Manager Account Setup:

The first box is for the manager to input the name that they want the employees to see, and to be displayed for them. The username and password is going to be the login credentials for the employer, KEEP THESE SOMEWHERE SAFE.

Step 3: Departments, Roles, and Skills

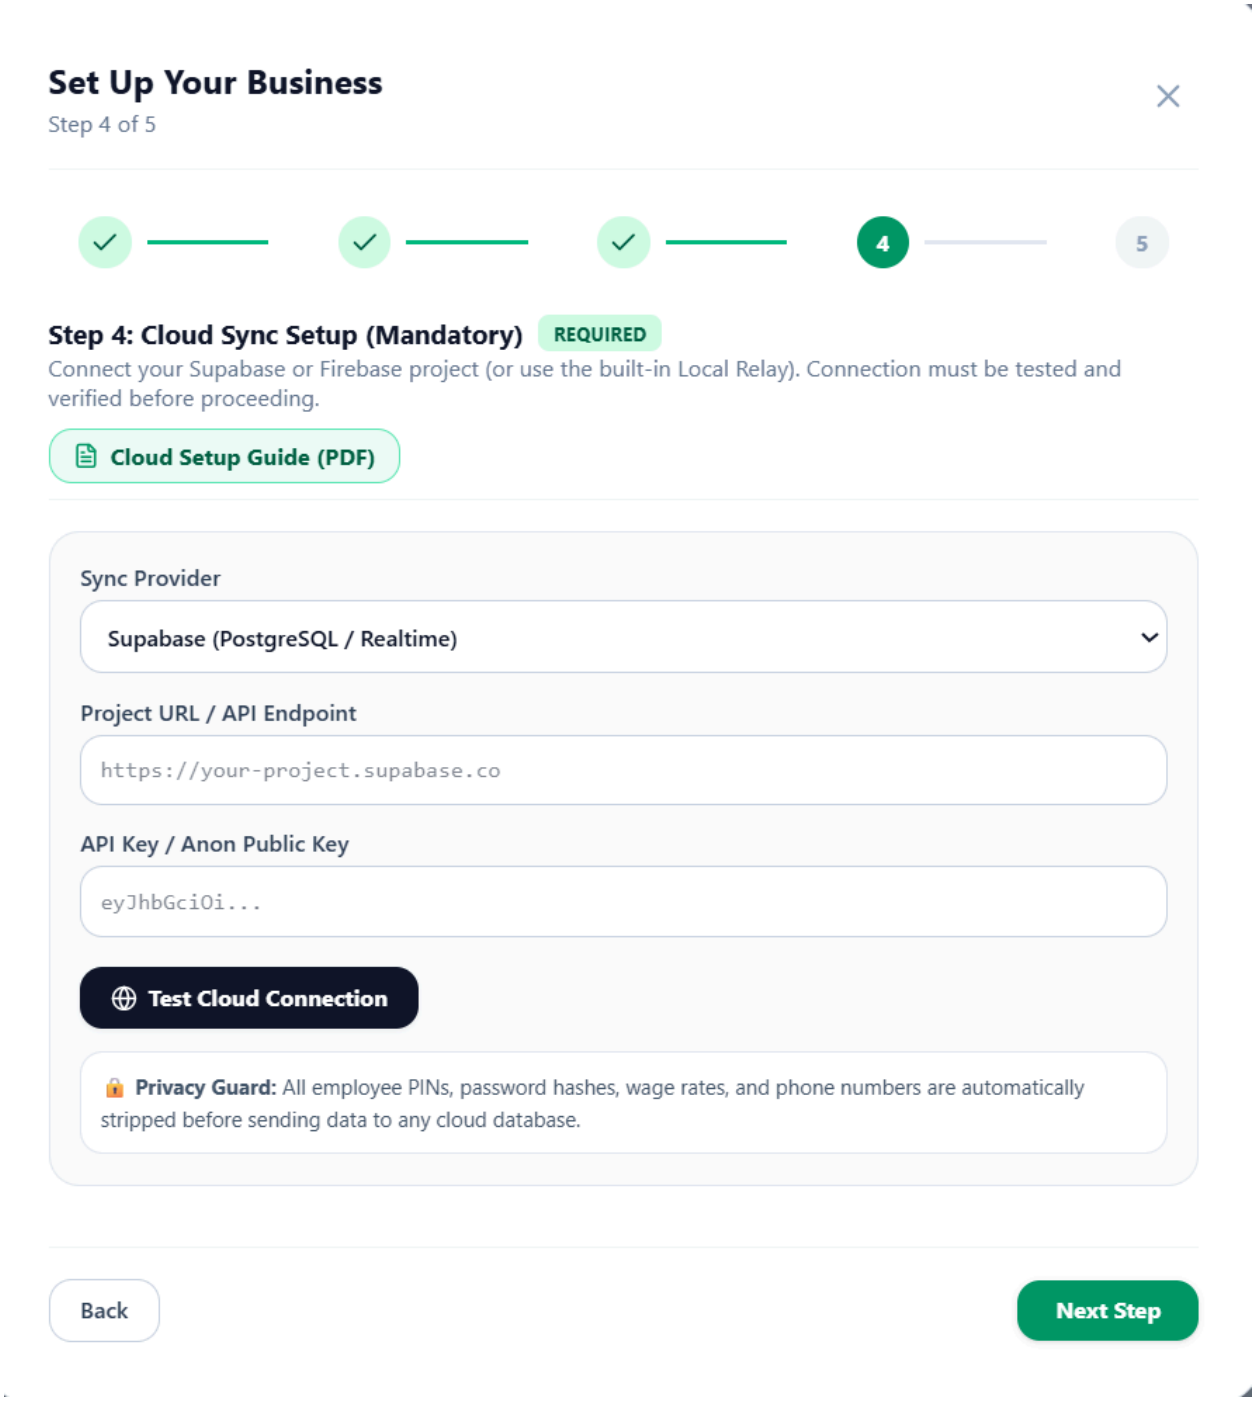

This section of setup is where you will fill out the structure of your specific business, it's set up for a restaurant but it can easily be changed by removing the prefilled tags and adding your own. Each tag can be applied to each staff member, allowing for management of cross training and certifications.

Departments: The department tags for your company may be different from what's displayed, for example in a hospital it might be ER, ICU, Radiology, Etc. You can assign multiple departments to each person in case they get cross trained.
Job Roles: The job roles tags should encompass all the different jobs you have at the company, for example in a hospital there might be Nurse, Doctor, Janitor, etc. You can assign multiple roles to each person in case they get cross trained. (NOTE: only employees that have the proper job roles can take open shifts for that job.)

Skills and Shift Tags: This is where certifications and special roles would be placed, in the hospital example, Med Student, In Residency, Department Head, etc.

Step 4: Required Cloud Setup

DON'T BE AFRAID

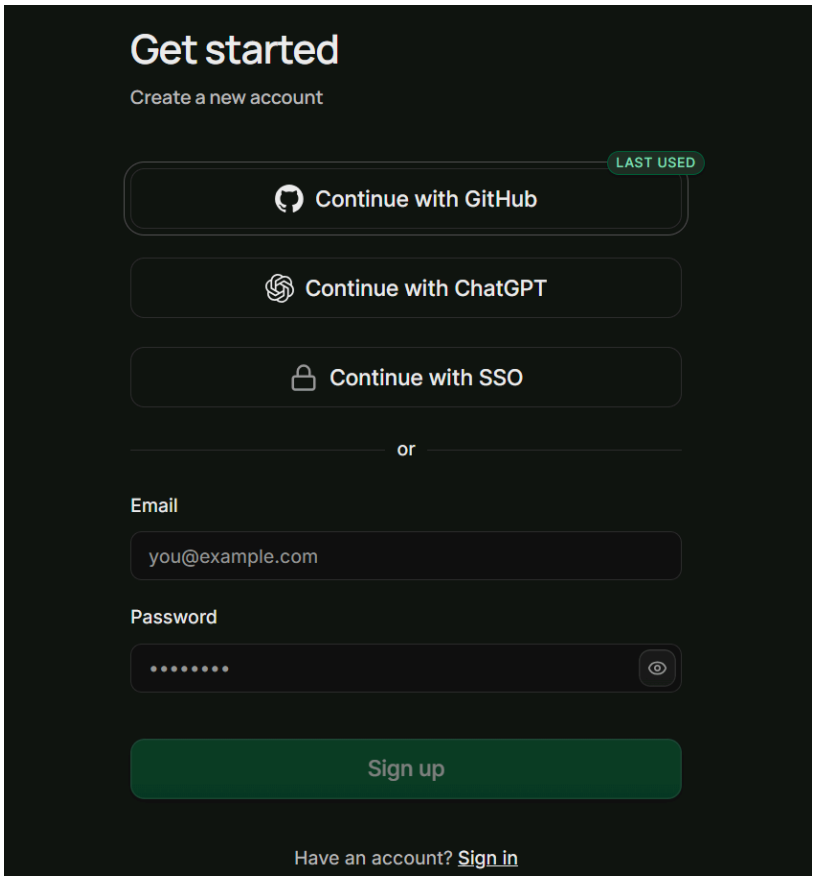

It's simpler than it looks.

Option 1: Supabase (Recommended, and easiest)

Supabase Cloud Setup

Step 1:

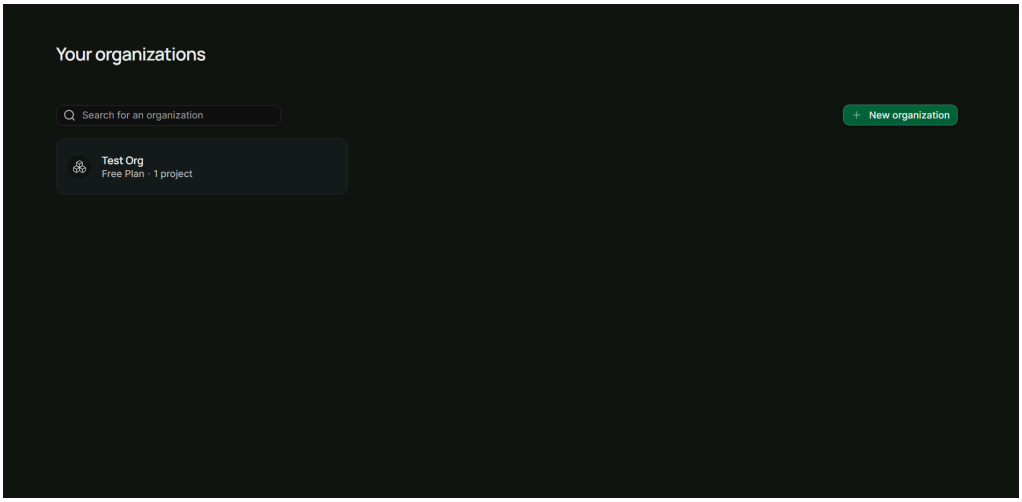

1. Go to supabase.com.
2. Click **"Start your project"** in the top right corner.

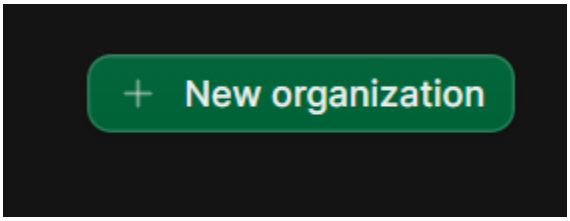

3. Sign up using your GitHub account or your email address.

Step 2: Create a New Project

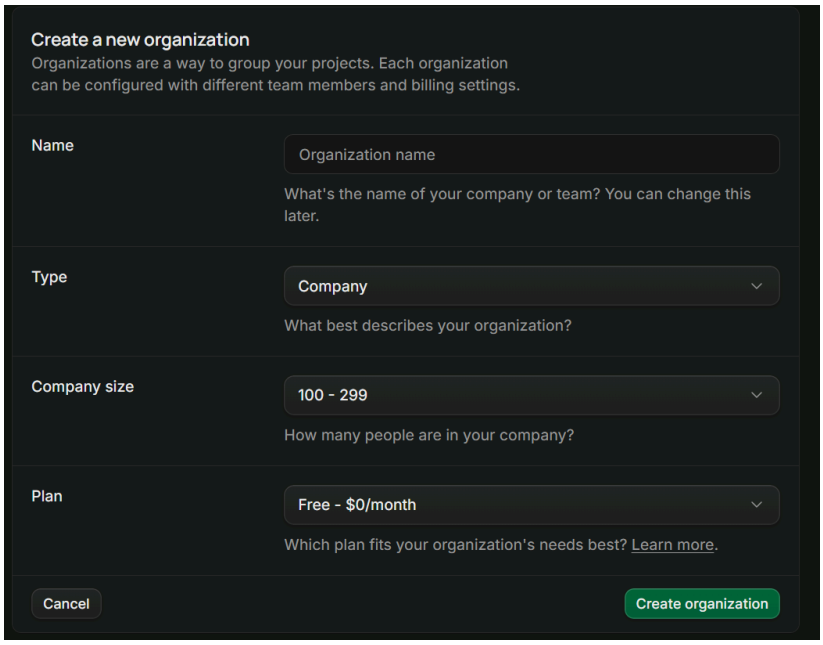

Dashboard:

1. Once logged into your dashboard, click **"New Project"**. (It may be listed as New Organization).

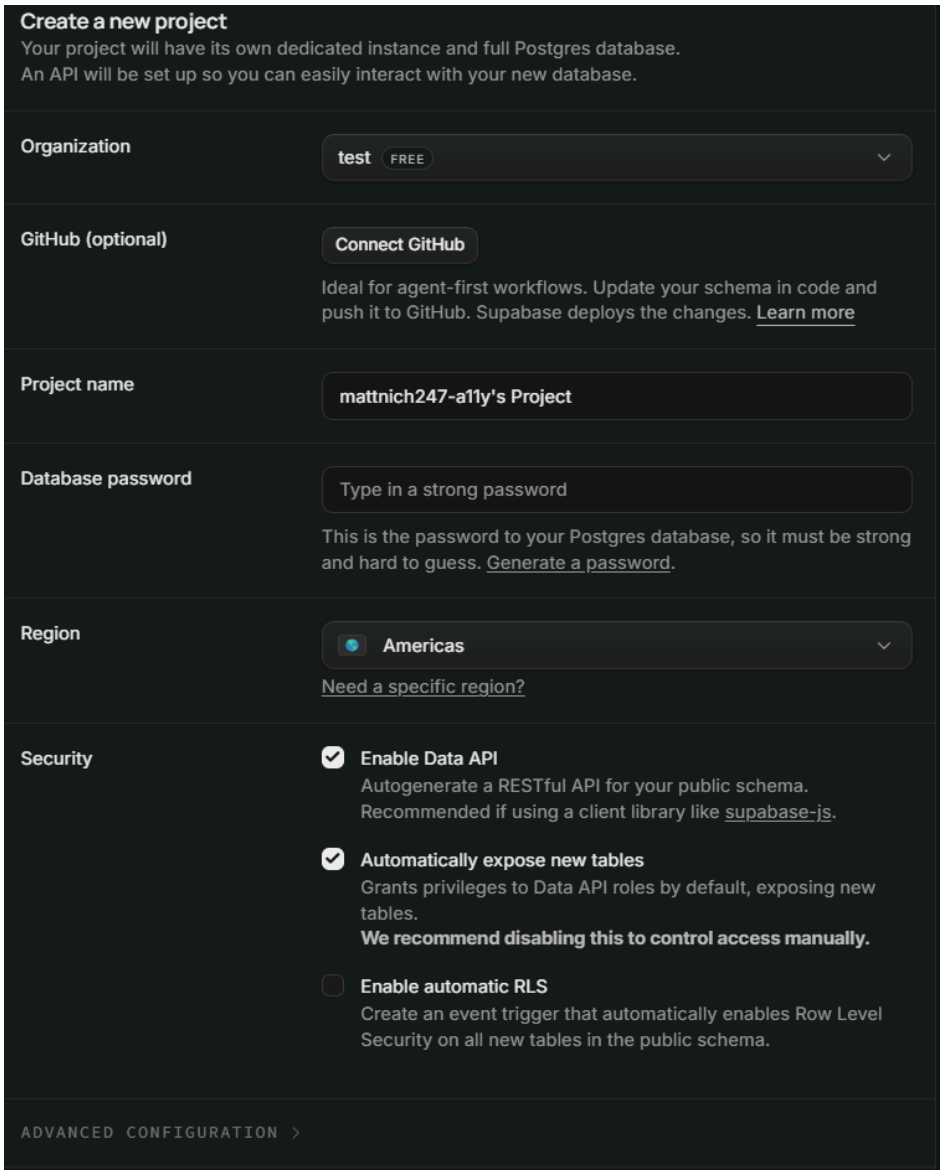

2. Fill in your project details:

- **Name:** Give your project a name (e.g. *Your Business*,).

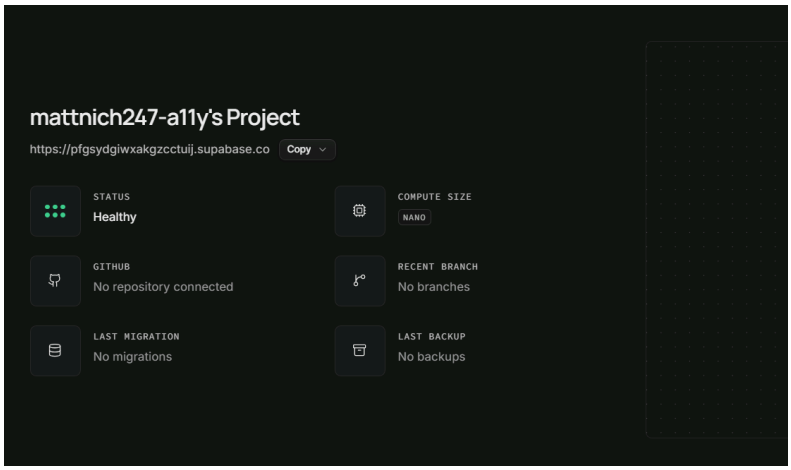

- **Type:** The type and company size have no bearing on this application.
- **Database Password:** Create a secure password and save it somewhere safe. (Recommended to save it with your username and password)
- **Pricing Plan:** Choose the **Free Plan**. The max users in the free plan is 200 employees, so companies over that amount may need to upgrade.

3. Click **"Create new project"** and wait a minute or two for your database to set up.

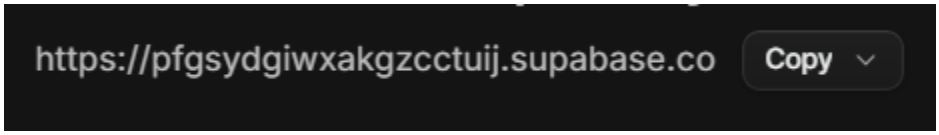

NOTE: The data API, Expose new tables, and automatic RLS have no impact on the app, feel free to set those how you wish.

Step 3: Find Your URL and Public Key

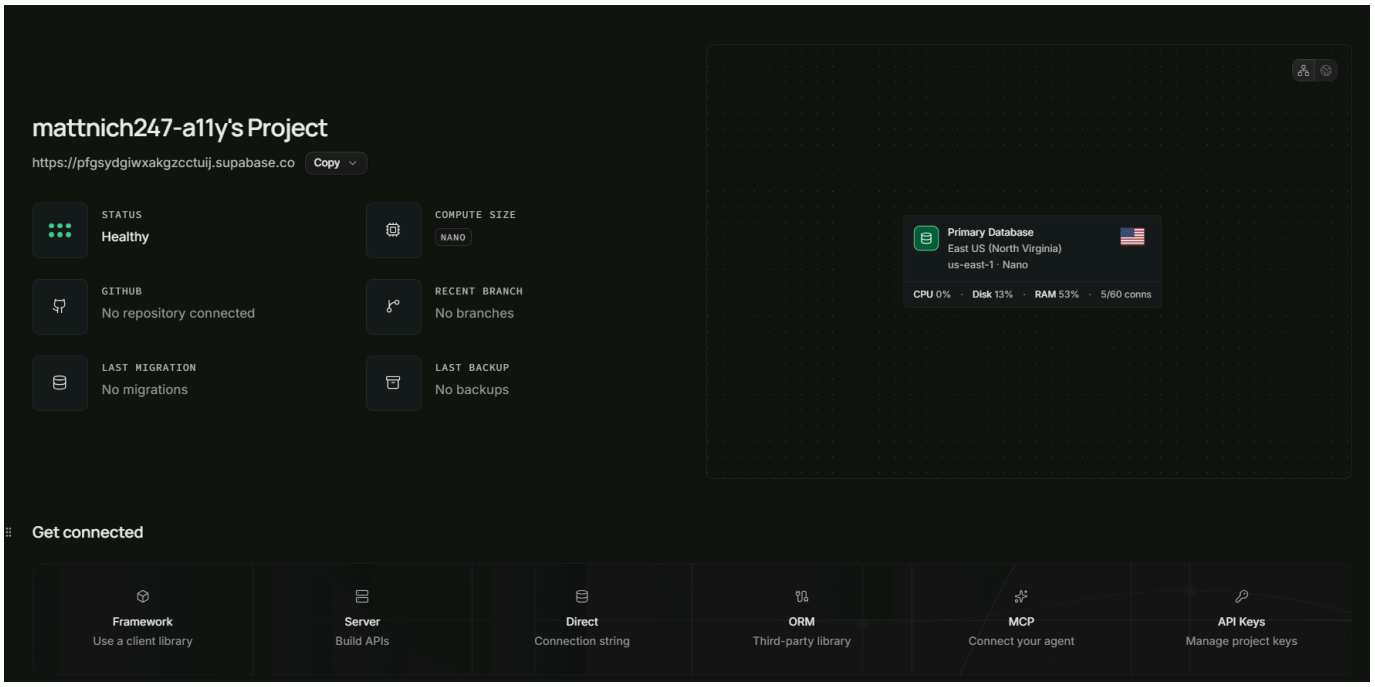

1. Right under your project name should be your URL for the project:

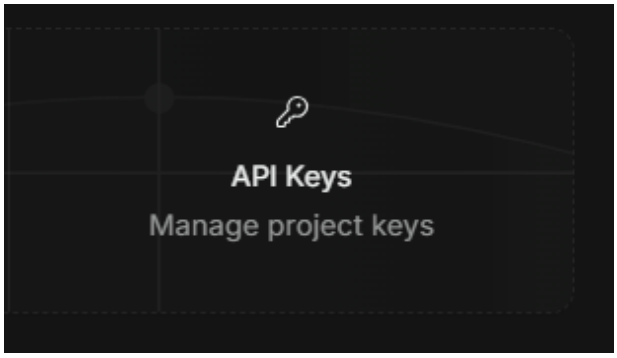

2. Click copy, and then paste this URL into the same spot in OpenSchedual

3. In the bar under lower bar of your project page, find API key (Bottom right):

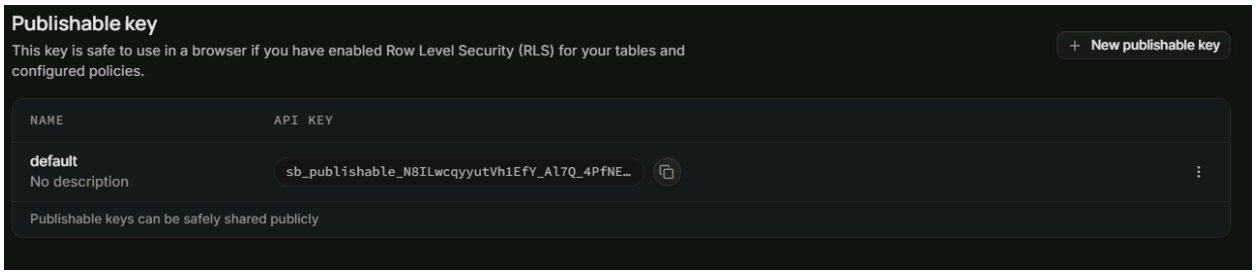

NOTE: This is not the same API key to enable optional AI mode.

Click this button:

In this page, look for **Publishable Key**:

Copy the **Publishable/Public Key** into the second line of OpenSchedule.

IMPORTANT: Save the URL and PublicKey somewhere safe, you will need these to log in if you are coming from a different device or clear your browser data.

—----------

Incase you need your URL and Key later:

1. Once your project is ready, look at the left-hand sidebar and click the **Gear Icon (Project Settings)** at the bottom.
2. In the settings menu, click on **API**.
3. On this page, you will see two things you need to copy:
    - **Project URL:** Copy the long web address (starts with https://...).
    - **Project API keys (anon / public):** Copy the long string labeled **anon** or **public** (this is your Public Key).
4. Paste these two items into Open Schedule's setup screen, and you're all set!

NOTE: Save the URL and Publickey in a safe and easy to reach place. You will need it if your browser data ever resets, or you get a new device.

Option 2: Firebase

(IMPORTANT: You only need one option set up.)

Firebase Cloud Setup

Step 1: Sign In to Firebase

1. Open your web browser and go to **console.firebase.google.com**.
2. Sign in using any standard **Google / Gmail account**. If you are already signed into Gmail on your computer, it might log you in automatically.

Step 2: Create a New Project

1. Once you are on the main page, click the big button that says **Create a project** (or **Add project**).
2. Type a name for your project (for example: `My Work Schedule`).
3. Click **Continue**.
4. *(Optional)* If it asks you about Google Analytics, you can safely turn the switch **Off** to keep things simple, then click **Create project**.
5. Wait a moment for the screen to load, and when it says "Your new project is ready," click **Continue**.

Step 3: Set Up Your Database

1. Look at the menu on the left side of the screen. Click on **Build**, and then click on **Firestore Database**.
2. Click the big **Create database** button.
3. Choose a location close to you (you can leave the default one selected) and click **Next**.
4. Select **Start in test mode** (this makes it easy for your app to connect without complicated security rules right away) and click **Enable**.
5. Wait a few seconds for the database to build.

Step 4: Get Your Web App Keys (URL and API Key)

Now we just need to get the secret codes (keys) your app needs to talk to your new Firebase account.

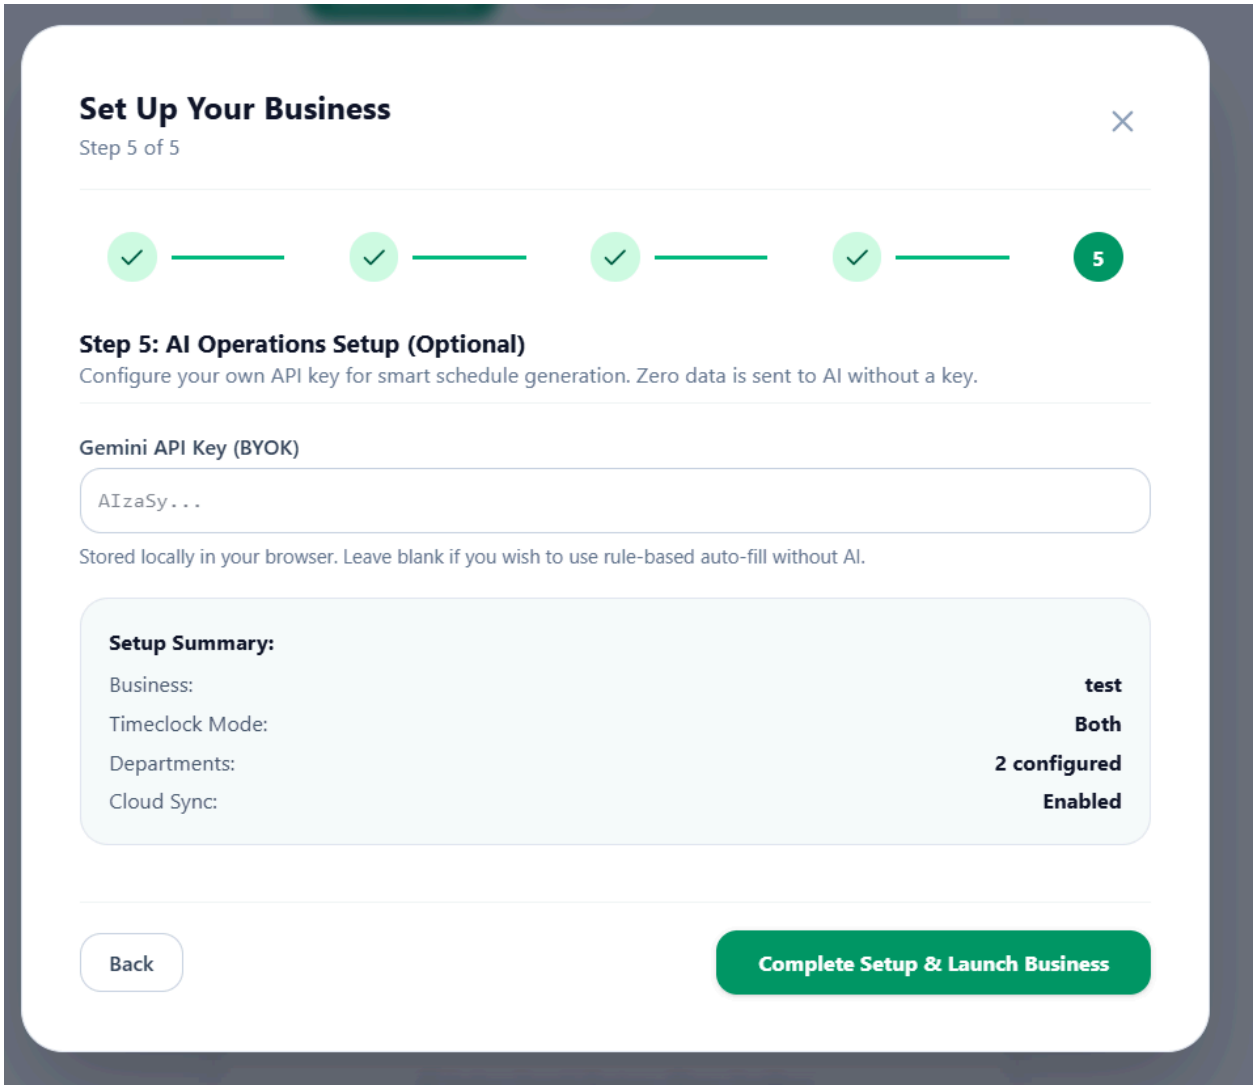

1. Look at the top left corner of the screen, right next to where it says "Project Overview". Click the **Gear Icon** (Settings).
2. From the small menu that pops up, click **Project settings**.

3. Scroll down the page until you see a section called **Your apps**.
4. Click on the **Web icon** (it looks like a set of code brackets: `</>`).
5. Type a nickname for your app (like `Open Schedule App`) and click **Register app**.
6. Scroll down the page until you see a block of text that starts with `const firebaseConfig = {`.
7. Look inside that box for two things:
    - **`apiKey`**: This is a long string of letters and numbers (your Public Key).
    - **`projectId`** or your general project web address: This forms your database URL.

Copy those two pieces of information, and you are ready to paste them right back into your app setup screen!

NOTE: Save the URL and Publickey in a safe and easy to reach place. You will need it if your browser data ever resets, or you get a new device.

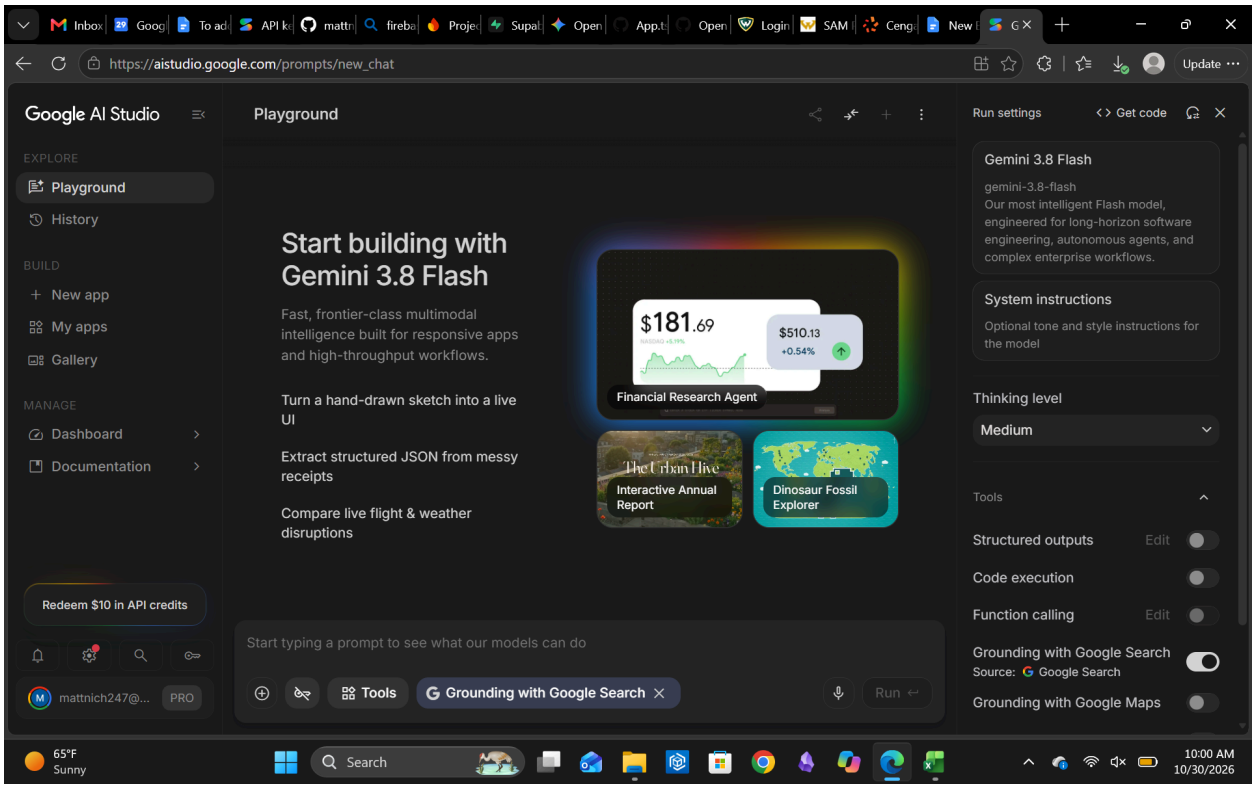

Step 5: AI Key

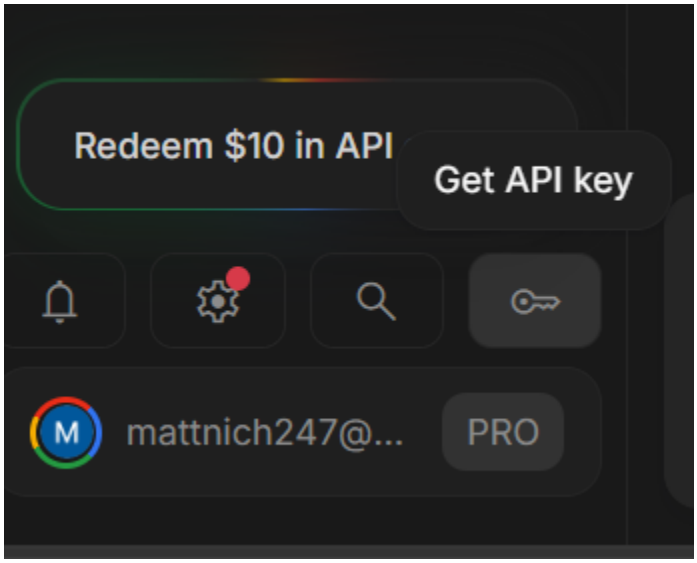

This section of setup is where you will set up any AI features. You can always add the features later in settings, and you can skip this stage by just clicking complete setup and launch business.

Where to find API key for AI Features: Creating an API key is incredibly easy, you can do it in 3 small steps.

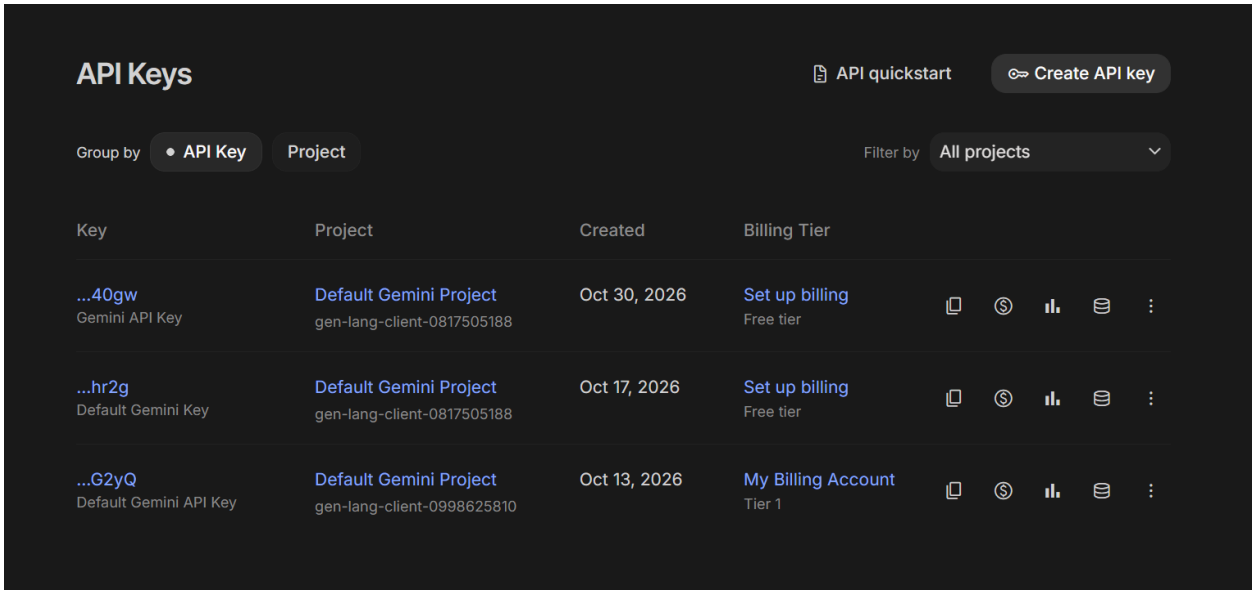

1. Open aistudio.google.com and sign in/up.
2. In the homepage, click API keys:

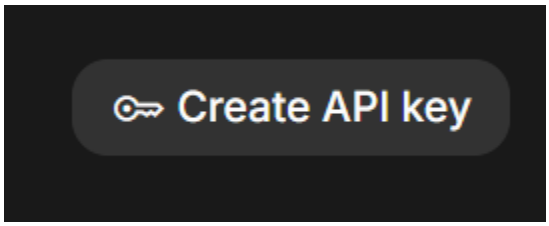

a. Click the Key symbol button in the bottom left corner next to your account.

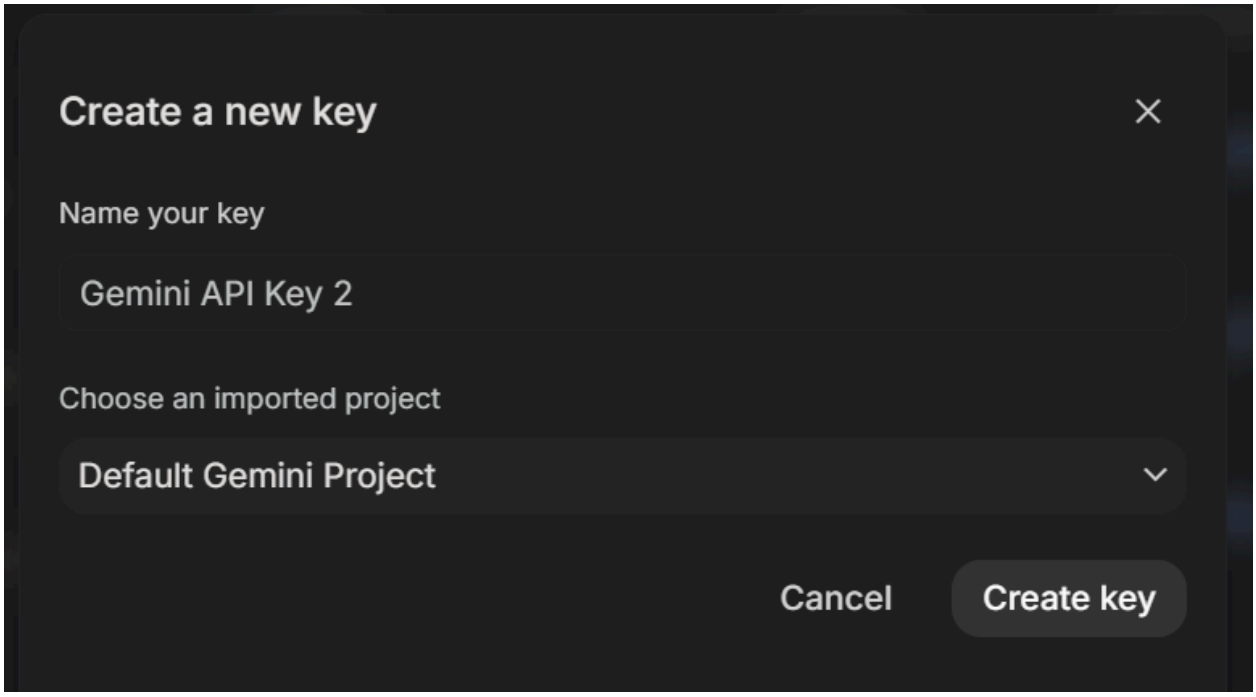

b. It will bring you to this page. (You probably won't have any prefilled keys.)

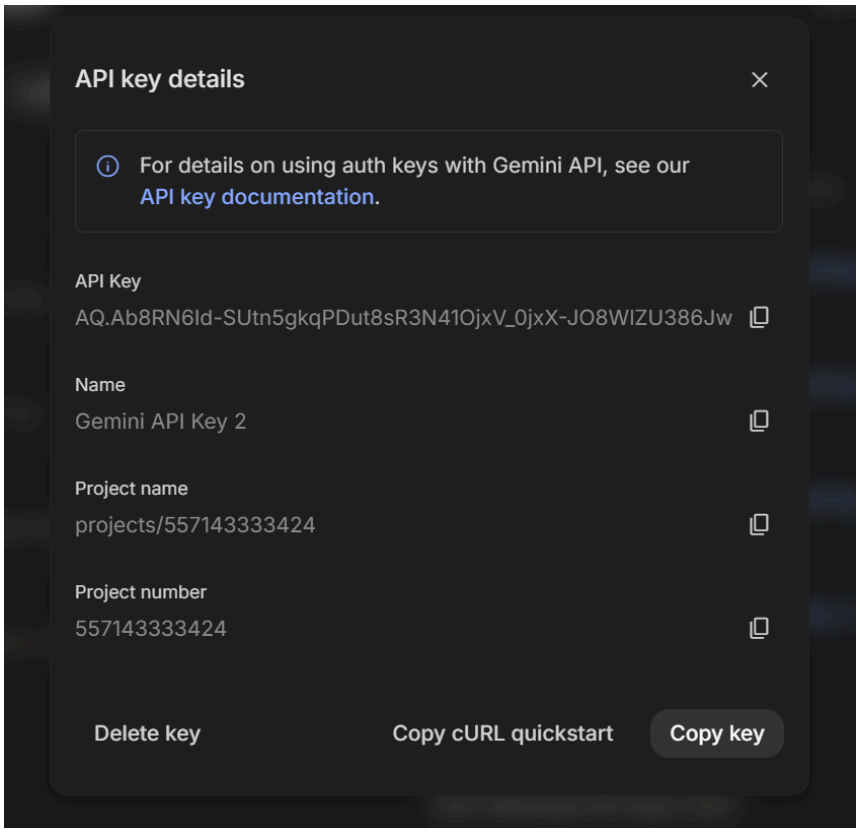

c. Click “Create API Key” in the top right corner.

d. You can name it whatever you want, then click “Create Key”

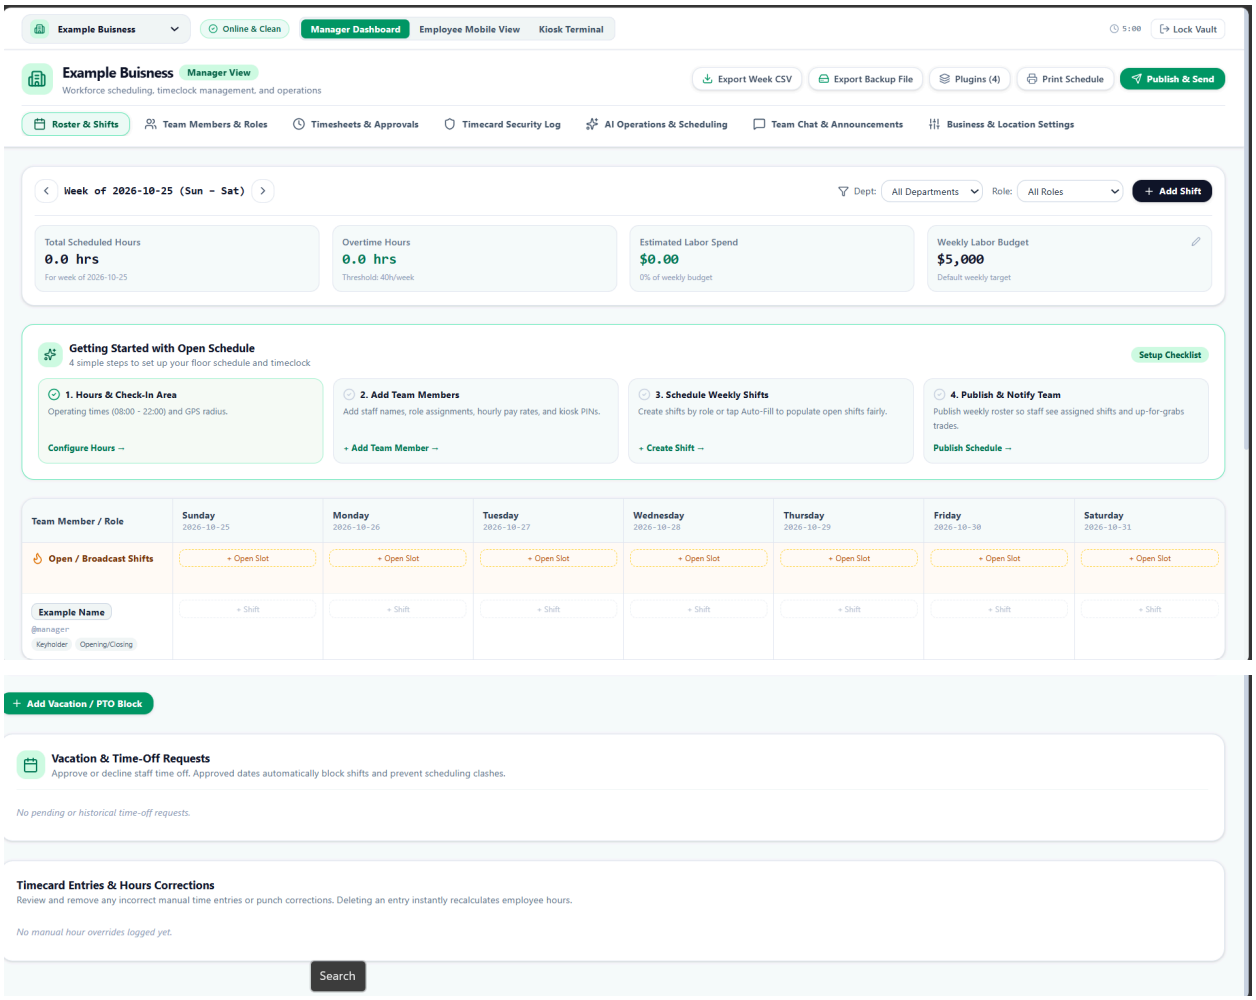

e. Copy the key and paste it back into OpenSchedual

Dashboards Manual

Manager Dashboard:

1. Roster and Shifts:

Open Schedule: Manager Portal Reference Manual

1. Top Global Navigation & Simulation Toolbar (Top-Most Bar)

* **Active Workspace Selector (`Example Business`)**: A multi-workspace dropdown menu that lets managers instantly switch between different organization portals stored locally or across linked cloud projects.

*   **Network Synchronization Status (`Online & Clean`)**: A real-time connection status pill. Displays "Online & Clean" when local changes are successfully synced to the cloud, or indicates offline/unsaved status if network connection drops.
*   **Primary Application Mode Switcher**:
    *   **`Manager Dashboard`**: The active control center for scheduling, labor tracking, staff accounts, and operational configuration.
    *   **`Employee Mobile View`**: Switches the viewport to the staff interface for testing mobile shift claims, timeclock punches, and messaging.
    *   **`Kiosk Terminal`**: Launches the dedicated PIN-based tablet interface intended for breakroom entrance clock-ins.
*   **Inactivity Auto-Lock Timer (`5:00`)**: A live countdown timer displaying remaining session time before the secure manager vault automatically locks due to inactivity.
*   **`Lock Vault` Button**: Immediately terminates the current session and locks the portal back to the master login authentication screen.

---

2. Header and Quick Action Toolbar (Sub-Header)
*   **Organization Branding (`Example Business`)**: Displays the active business title and subtitle ("Workforce scheduling, timeclock management, and operations").
*   **`Export Week CSV`**: Generates and downloads a detailed comma-separated values (CSV) spreadsheet breakdown for the active week, mapping individual employee hours, regular vs. overtime pay rates, department tags, and shift cost allocations.
*   **`Export Backup File`**: Triggers an instant download of the complete encrypted `.openschedule` system backup file for local or cloud disaster recovery.
*   **`Plugins (4)`**: Opens the modular plugin manager modal to enable or configure extensions (such as payroll integrations and community tools).
*   **`Print Schedule`**: Opens a clean, high-contrast print preview modal formatted for physical 8.5x11 breakroom walls, with options to download a raw HTML print file.
*   **`Publish & Send`**: A primary action button that converts all draft shifts for the selected week into published shifts, making them instantly visible and claimable on employee mobile devices.

---

3. Main Navigation Tab Bar
*   **`Roster & Shifts`**: The primary scheduling calendar workspace view (currently active).
*   **`Team Members & Roles`**: Opens the staff roster management grid for adding personnel, setting pay rates, and assigning PINs.

* **`Timesheets & Approvals`**: Displays scheduled vs. clocked hours, payroll period approval controls, and manual timecard adjustment entries.
* **`Timecard Security Log`**: Accesses the cryptographic hash ledger, tamper-simulation tools, and administrative action audit trails.
* **`AI Operations & Scheduling`**: Opens the AI assistant panel for forecasting staffing demand, generating draft schedules, and analyzing uploaded PoS/reservation files.
* **`Team Chat & Announcements`**: Broadcasts company-wide notices or manages real-time staff communication channels.
* **`Business & Location Settings`**: Configures operational hours, geofence coordinates, labor budgets, and access codes.

---

4. Schedule Toolbar & Week Controller (`Roster & Shifts` Tab)
* **Week Switcher (`Week of 2026-10-25 (Sun – Sat)`)**: Left and right chevron buttons that shift the active calendar week forward or backward by 7 days.
* **Department Filter (`Dept: All Departments`)**: Filters the roster grid to display shifts belonging to a specific operational department.
* **Role Filter (`Role: All Roles`)**: Narrows roster visibility down to specific job roles.
* **`+ Add Shift`**: Opens the shift creation modal to schedule a new shift by date, time, role, and assigned employee.

---

5. Labor Budget & Metrics Bar
* **Total Scheduled Hours (`0.0 hrs`)**: Displays the aggregate hours scheduled across all staff members for the selected week.
* **Overtime Hours (`0.0 hrs`)**: Tracks total hours exceeding the weekly overtime threshold (default: 40h/week).
* **Estimated Labor Spend (`$0.00`)**: Calculates total projected labor cost based on individual employee hourly wage rates and overtime multipliers (1.5x).
* **Weekly Labor Budget (`$5,000`)**: Displays the target budget limit for the week, complete with a quick-edit pencil icon to modify the budget for seasonal adjustments.

---

6. Getting Started Setup Checklist
* **Checklist Status Banner (`Setup Checklist`)**: An interactive 4-step deployment guide that highlights foundational configuration tasks:
    1. **Hours & Check-In Area**: Configures operational times and GPS geofence radius.

2. **Add Team Members**: Registers staff credentials, rates, and PINs.
3. **Schedule Weekly Shifts**: Populates the floor roster.
4. **Publish & Notify Team**: Deploys the schedule to staff devices.

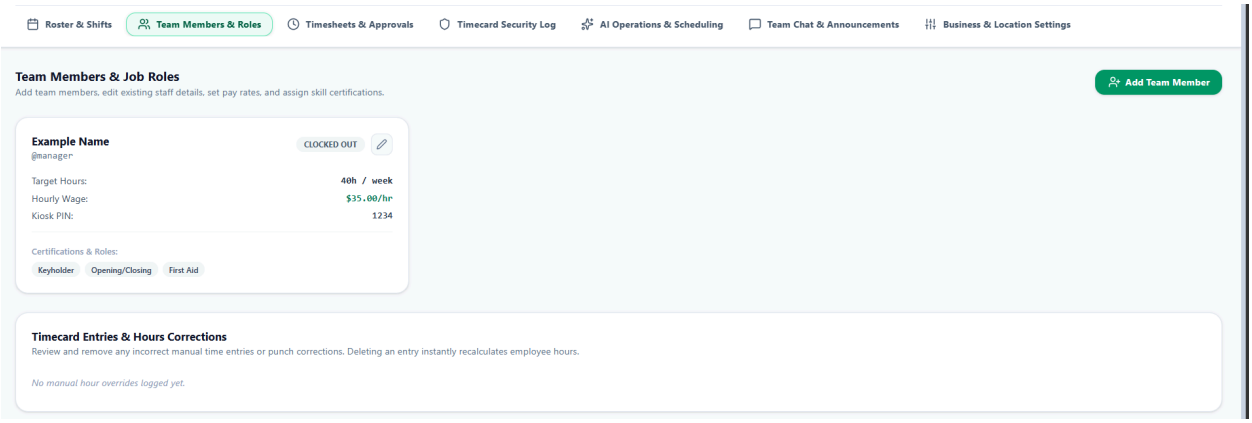

---

7. Weekly Calendar Roster Grid
* **Date Columns (Sunday through Saturday)**: Displays daily column headers with corresponding calendar dates (e.g., `2026-10-25` through `2026-10-31`).
* **Open / Broadcast Shifts Row (`Open / Broadcast Shifts`)**: A dedicated top row for unassigned shifts that are broadcasted to the open pool. Features `+ Open Slot` action buttons for each day.
* **Staff Roster Rows (`Example Name`)**: Individual employee rows displaying:
  * **Employee Badge**: Permanent color-coded badge with employee name, username (`@manager`), and role/skill certification tags (`Keyholder`, `Opening/Closing`).
  * **Daily Shift Slots**: Individual cells for each day of the week containing scheduled shifts or empty `+ Shift` triggers to add targeted shifts on specific days.

---

8. Vacation, Time-Off & Manual Corrections Panel
* **`+ Add Vacation / PTO Block`**: Opens a dedicated modal allowing managers to manually schedule and pre-approve vacation or paid time off (PTO) blocks for any team member, blocking out conflicting shifts automatically.
* **Vacation & Time-Off Requests Section**: Displays the active approval queue for staff-submitted time-off requests, including dates, request types (Vacation, PTO, Personal), part-of-day options (Full day, Morning, Night), and instant Approve/Decline actions.
* **Timecard Entries & Hours Corrections Section**: An audit and management table tracking manual time entries and hour corrections. Allows managers to review adjustment reasons and click `Remove Hours` to instantly recalculate employee timesheets and remove associated audit logs.

2. Team Members and Roles:

Open Schedule: Team Members & Roles Tab Reference Manual

1. Top Navigation & Header Controls
* **Main Navigation Tabs**: Allows the manager to switch between different sections of the portal (`Roster & Shifts`, `Team Members & Roles`, `Timesheets & Approvals`, `Timecard Security Log`, `AI Operations & Scheduling`, `Team Chat & Announcements`, `Business & Location Settings`). The active tab is `Team Members & Roles`.
* **Section Title & Subtitle (`Team Members & Roles`)**: Explains the purpose of the tab ("Add team members, edit existing staff details, set pay rates, and assign skill certifications").
* **`+ Add Team Member` Button**: A primary action button that opens the staff creation modal to add new personnel, configure credentials, set target weekly hours, base hourly pay rates, and generate login links.

---

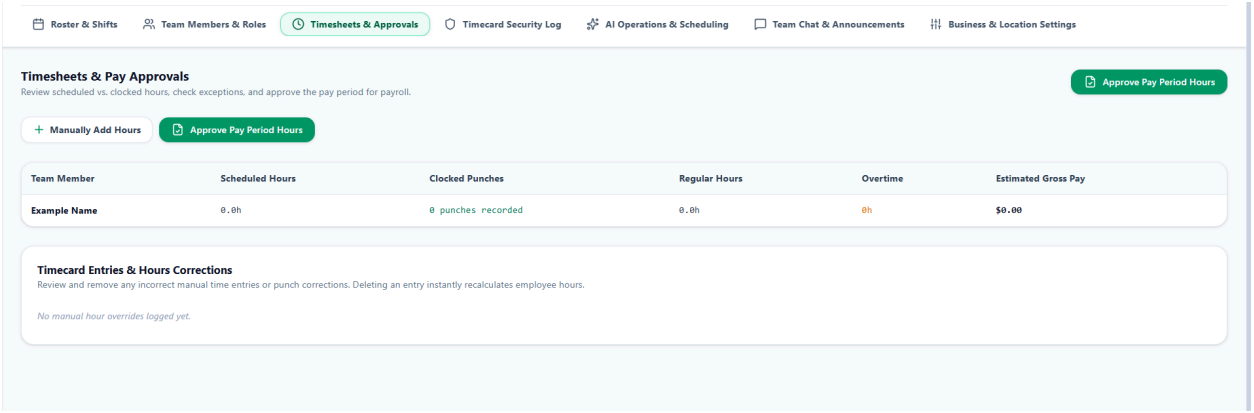

2. Team Member Profile Card (`Example Name`)
* **Staff Identity & Username**: Displays the employee's full name (`Example Name`) and system handle (`@manager`).
* **Current Punch Status (`CLOCKED OUT`)**: A real-time status pill indicating whether the staff member is currently clocked in, on break, or clocked out.
* **Edit Profile Button (Pencil Icon)**: Opens the staff configuration modal to modify existing team member details, reset passwords, or update PINs.
* **Target Hours (`40h / week`)**: Defines the target weekly working hours assigned to the employee for scheduling and capacity tracking.
* **Hourly Wage (`$35.00/hr`)**: Displays the staff member's base hourly rate used for labor cost calculations and payroll estimates.

* **Kiosk PIN (`1234`)**: Shows the employee's unique 4-digit PIN code used for fast breakroom kiosk terminal check-ins.
* **Certifications & Roles Section**: Displays assigned skill and role tags (e.g., `Keyholder`, `Opening/Closing`, `First Aid`) used by the scheduler engine for matching qualified staff to shifts.

---

3. Timecard Entries & Hours Corrections Panel
* **Section Header (`Timecard Entries & Hours Corrections`)**: Documents the audit interface for reviewing and managing manual time entries or punch corrections ("Review and remove any incorrect manual time entries or punch corrections. Deleting an entry instantly recalculates employee hours.").
* **Empty State Notice (`No manual hour overrides logged yet.`)**: Indicates that no manual hours or corrections have been submitted for the current session.

3. Timesheets and Approval:

Open Schedule: Timesheets & Approvals Tab Reference Manual

1. Top Navigation & Header Controls
* **Main Navigation Tabs**: Allows the manager to switch between different sections of the portal (`Roster & Shifts`, `Team Members & Roles`, `Timesheets & Approvals`, `Timecard Security Log`, `AI Operations & Scheduling`, `Team Chat & Announcements`, `Business & Location Settings`). The active tab is `Timesheets & Approvals`.

*   **Section Title & Subtitle (`Timesheets & Pay Approvals`)**: Explains the purpose of the view ("Review scheduled vs. clocked hours, check exceptions, and approve the pay period for payroll").
*   **Top `Approve Pay Period Hours` Button**: A primary action button located on the top right that signs off on the active pay period to prepare it for payroll export.

---

2. Sub-Action Toolbar
*   **`+ Manually Add Hours` Button**: Opens the manual hours override modal to record custom clock-in/out times for an employee.
*   **Secondary `Approve Pay Period Hours` Button**: A duplicate quick-action button to approve the current pay period's hours.

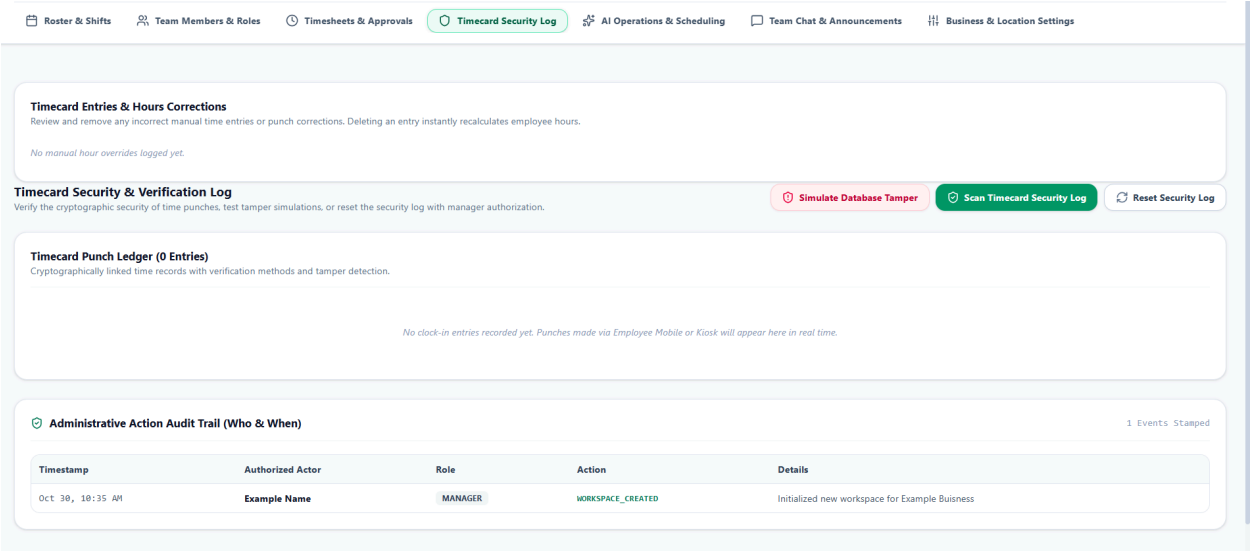

---

3. Timesheets & Pay Summary Table
*   **Table Headers**:
    *   **`Team Member`**: Displays the name of the staff member.
    *   **`Scheduled Hours`**: Total hours assigned via published shifts for the pay period.
    *   **`Clocked Punches`**: Count of verified security log punches recorded by the employee.
    *   **`Regular Hours`**: Hours eligible for standard pay (capped at the weekly overtime limit).
    *   **`Overtime`**: Hours exceeding the weekly threshold, calculated at an overtime multiplier.
    *   **`Estimated Gross Pay`**: Projected total compensation based on regular and overtime hours multiplied by the employee's hourly wage rate.
*   **Employee Row Data (`Example Name`)**: Shows individual breakdown stats (e.g., `0.0h` scheduled, `0 punches recorded`, `0.0h` regular, `0h` overtime, and `$0.00` estimated gross pay).

---

4. Timecard Entries & Hours Corrections Panel
*   **Section Header (`Timecard Entries & Hours Corrections`)**: Documents the audit log for manual overrides ("Review and remove any incorrect manual time entries or punch corrections. Deleting an entry instantly recalculates employee hours.").
*   **Empty State Notice (`No manual hour overrides logged yet.`)**: Indicates that no manual hour adjustments or corrections have been recorded for the current pay period.

4. Timecard and Security Log:

Open Schedule: Timecard Security Log Tab Reference Manual

1. Top Navigation & Header Controls
* **Main Navigation Tabs**: Allows the manager to switch between different sections of the portal (`Roster & Shifts`, `Team Members & Roles`, `Timesheets & Approvals`, `Timecard Security Log`, `AI Operations & Scheduling`, `Team Chat & Announcements`, `Business & Location Settings`). The active tab is `Timecard Security Log`.

---

2. Timecard Entries & Hours Corrections Panel
* **Section Header (`Timecard Entries & Hours Corrections`)**: Documents the manual time override audit interface ("Review and remove any incorrect manual time entries or punch corrections. Deleting an entry instantly recalculates employee hours.").
* **Empty State Notice (`No manual hour overrides logged yet.`)**: Indicates that no manual hour overrides have been logged for the active session.

---

3. Timecard Security & Verification Log Toolbar
* **Section Header & Description (`Timecard Security & Verification Log`)**: Explains the purpose of the security audit tools ("Verify the cryptographic security of time punches, test tamper simulations, or reset the security log with manager authorization.").

*   **`Simulate Database Tamper` Button**: Triggers a test alteration on a punch record to demonstrate the system's cryptographic tamper-detection capabilities.
*   **`Scan Timecard Security Log` Button**: Executes a cryptographic audit across all time punches to verify hash chains and integrity status.
*   **`Reset Security Log` Button**: Requires manager password authorization to repair and recalculate clean cryptographic hash links across all timecard entries.

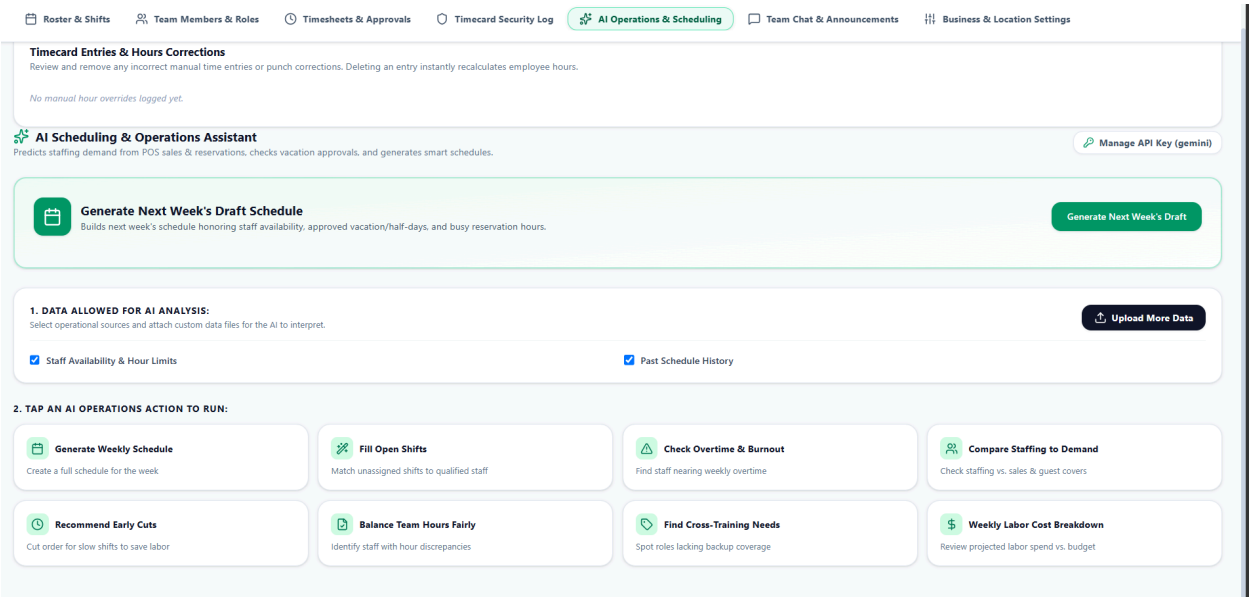

---

4. Timecard Punch Ledger
*   **Section Header (`Timecard Punch Ledger (0 Entries)`)**: Displays the cryptographically linked time records with verification methods and tamper detection.
*   **Empty State Notice (`No clock-in entries recorded yet. Punches made via Employee Mobile or Kiosk will appear here in real time.`)**: Indicates that no mobile or kiosk clock-in/out records have been submitted yet.

---

5. Administrative Action Audit Trail
*   **Section Header & Counter (`Administrative Action Audit Trail (Who & When)`)**: Tracks permanent administrative stamps (`1 Events Stamped`) recording significant actions across the portal.
*   **Audit Table Columns**:
    *   **`Timestamp`**: Exact date and time of the logged event (e.g., `Oct 30, 10:35 AM`).
    *   **`Authorized Actor`**: Name of the user who performed the action (`Example Name`).
    *   **`Role`**: The security role of the actor (`MANAGER`).
    *   **`Action`**: The programmatic identifier of the event (`WORKSPACE_CREATED`).
    *   **`Details`**: A human-readable description of the event (`Initialized new workspace for Example Business`).

5. AI Operations and Scheduling:

Open Schedule: AI Operations & Scheduling Tab Reference Manual

1. Top Navigation & Header Controls

* **Main Navigation Tabs**: Allows the manager to switch between different sections of the portal (`Roster & Shifts`, `Team Members & Roles`, `Timesheets & Approvals`, `Timecard Security Log`, `AI Operations & Scheduling`, `Team Chat & Announcements`, `Business & Location Settings`). The active tab is `AI Operations & Scheduling`.

---

2. Timecard Entries & Hours Corrections Panel

* **Section Header (`Timecard Entries & Hours Corrections`)**: Documents the manual time override audit interface ("Review and remove any incorrect manual time entries or punch corrections. Deleting an entry instantly recalculates employee hours.").

* **Empty State Notice (`No manual hour overrides logged yet.`)**: Indicates that no manual hour overrides have been logged for the active session.

---

3. AI Scheduling & Operations Assistant Header & Toolbar

* **Section Header & Description (`AI Scheduling & Operations Assistant`)**: Explains the purpose of the AI tools ("Predicts staffing demand from POS sales & reservations, checks vacation approvals, and generates smart schedules.").

* **`Manage API Key (gemini)` Button**: Allows the manager to update, view, or manage their connected AI provider API key.

---

4. Next Week's Draft Schedule Generator

* **Hero Card (`Generate Next Week's Draft Schedule`)**: Automates schedule creation based on business rules and forecasting ("Builds next week's schedule honoring staff availability, approved vacation/half-days, and busy reservation hours.").

* **`Generate Next Week's Draft` Button**: Triggers the AI model to build and preview the upcoming week's shift roster.

---

5. Data Allowed for AI Analysis

* **Section Header & Description (`1. DATA ALLOWED FOR AI ANALYSIS:`)**: Controls what operational data sources are exposed to the AI assistant ("Select operational sources and attach custom data files for the AI to interpret.").

* **`Upload More Data` Button**: Allows managers to attach custom data files (such as CSV, TXT, or JSON logs) for specialized AI interpretation.

* **Data Source Checkboxes**:

  * **`Staff Availability & Hour Limits`**: Grants the AI access to employee availability blocks and weekly hour caps.

  * **`Past Schedule History`**: Grants the AI access to historical shift data for trend analysis.

---

6. One-Click AI Operations Action Buttons

* **Section Header (`2. TAP AN AI OPERATIONS ACTION TO RUN:`)**: Provides instant access to specialized AI analytical routines:

  * **`Generate Weekly Schedule`**: Creates a full schedule for the week.

  * **`Fill Open Shifts`**: Matches unassigned shifts to qualified staff.

  * **`Check Overtime & Burnout`**: Identifies staff members nearing weekly overtime limits.

  * **`Compare Staffing to Demand`**: Cross-references staffing levels against point-of-sale sales data and guest covers.

  * **`Recommend Early Cuts`**: Generates a cut order for slow shifts to minimize unnecessary labor spend.

  * **`Balance Team Hours Fairly`**: Highlights staff members with hour discrepancies to ensure fair distribution.

  * **`Find Cross-Training Needs`**: Spots operational roles lacking adequate backup coverage.

  * **`Weekly Labor Cost Breakdown`**: Reviews projected labor spend against established weekly budgets.

6. Team Chat and Announcements:

Open Schedule: Team Chat & Announcements Tab Reference Manual

1. Top Navigation & Header Controls

* **Main Navigation Tabs**: Allows the manager to switch between different sections of the portal (`Roster & Shifts`, `Team Members & Roles`, `Timesheets & Approvals`, `Timecard Security Log`, `AI Operations & Scheduling`, `Team Chat & Announcements`, `Business & Location Settings`). The active tab is `Team Chat & Announcements`.

---

2. Timecard Entries & Hours Corrections Panel

* **Section Header (`Timecard Entries & Hours Corrections`)**: Documents the manual time override audit interface ("Review and remove any incorrect manual time entries or punch corrections. Deleting an entry instantly recalculates employee hours.").

* **Empty State Notice (`No manual hour overrides logged yet.`)**: Indicates that no manual hour overrides have been logged for the active session.

---

3. Team Chat & Manager Announcements Header & Controls

* **Section Header & Description (`Team Chat & Manager Announcements`)**: Explains the purpose of the communication panel ("Broadcast notices to the entire team or chat with coworkers in real-time.").

* **`Restrict to Manager Announcements Only` Checkbox**: Enables manager-only broadcast mode, allowing staff to read notices on mobile while preventing them from posting replies.

---

4. Message Channel Viewport & Composer

* **Channel Selector Tabs**:

  * **`Workplace Announcements`**: Active channel for broadcasting official notices to all team members (`0 messages`).

  * **`Team Discussion`**: Channel for general staff and coworker real-time discussions.

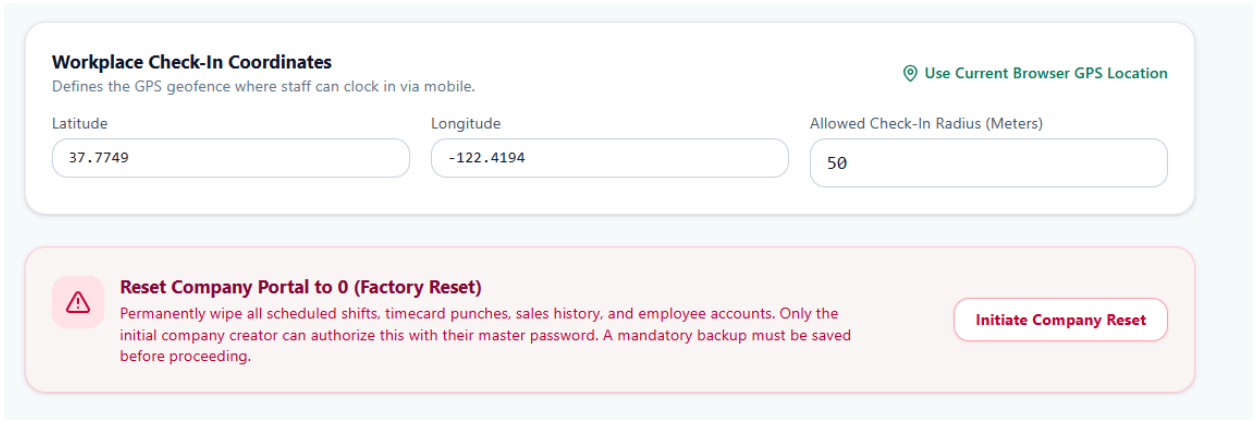

* **Message Feed Area**: Displays message history, sender names, and timestamps. Shows an empty state when no messages are present.

* **Message Input Bar (`Type an announcement for all team members...`)**: Text composer box used by managers to draft announcements.

* **`Send` Button**: Submits and broadcasts the message to all linked employee mobile devices in real-time.

7. Business and Location Settings:

Open Schedule: Business & Location Settings Tab Reference Manual

1. Top Navigation & Header Controls

* **Main Navigation Tabs**: Allows the manager to switch between different sections of the portal (`Roster & Shifts`, `Team Members & Roles`, `Timesheets & Approvals`, `Timecard Security Log`, `AI Operations & Scheduling`, `Team Chat & Announcements`, `Business & Location Settings`). The active tab is `Business & Location Settings`.

---

2. Departments, Job Roles & Skill Tags Manager

* **Section Header & Description (`Departments, Job Roles & Skill Tags`)**: Explains structural configuration rules ("Manage your company's organizational structure post-setup. You must maintain at least 1 department and 1 job role.").

* **Departments Management Box**: Displays current company departments (`Kitchen`, `Front of House`), delete buttons (`×`), and an input field with an `Add` button to create new departments.

* **Job Roles Management Box**: Displays current job roles (`General Manager`, `Shift Lead`, `Team Member`), delete buttons (`×`), and an input field with an `Add` button to create new roles.

* **Skill & Certification Tags Management Box**: Displays active skill tags (`Keyholder`, `Opening/Closing`, `First Aid`), delete buttons (`×`), and an input field with an `Add` button to create new tags.

---

3. Settings Header & Sub-Tab Navigation

* **Section Title & Description (`Business, Location & Cloud Settings`)**: Summarizes the configuration dashboard ("Configure operational rules, cloud sync, and view setup guides.").

* **`Help and Setup Guide` Button**: Opens the `staff-help.pdf` documentation file in a new browser tab.

* **Sub-Tab Switcher**:

  * **`General & Rules`**: Active sub-tab displaying operational features, organization details, geofence coordinates, and factory reset controls.

  * **`Cloud Sync & Privacy`**: Sub-tab for configuring database synchronization and data retention metrics.

  * **`App Guide & Help`**: Sub-tab containing embedded system documentation.

---

4. Active Business Features & Organization Details

* **Active Business Features Panel**: Checkbox toggles controlling core platform rules:
  * **`Use AI Scheduling & Operations`**: Enables AI features (requires an API key).
  * **`Track Hourly Pay & Labor Budget`**: Enables wage tracking and payroll calculations.
  * **`Require Approval for Vacation & PTO`**: Routes employee time-off requests to the manager approval queue.
  * **`Restrict Team Chat to Manager Announcements`**: Restricts the chat feed so staff can view notices but cannot send messages.
* **Organization Details Panel**:
  * **Business Name Input (`Example Business`)**: Defines the official name of the organization.
  * **Default Weekly Labor Budget ($) Input (`5000`)**: Sets the standard target weekly labor spend limit.

---

5. Workplace Check-In Coordinates & Factory Reset

* **Workplace Check-In Coordinates Panel**: Defines the GPS geofence where staff are permitted to clock in via mobile devices.
  * **`Use Current Browser GPS Location` Button**: Automatically populates latitude and longitude fields using the browser's current geolocation.
  * **Latitude Input (`37.7749`)**: Sets the geofence latitude coordinate.
  * **Longitude Input (`-122.4194`)**: Sets the geofence longitude coordinate.

* **Allowed Check-In Radius (Meters) Input (`50`)**: Specifies the maximum allowed distance in meters from the coordinates for a valid mobile clock-in.

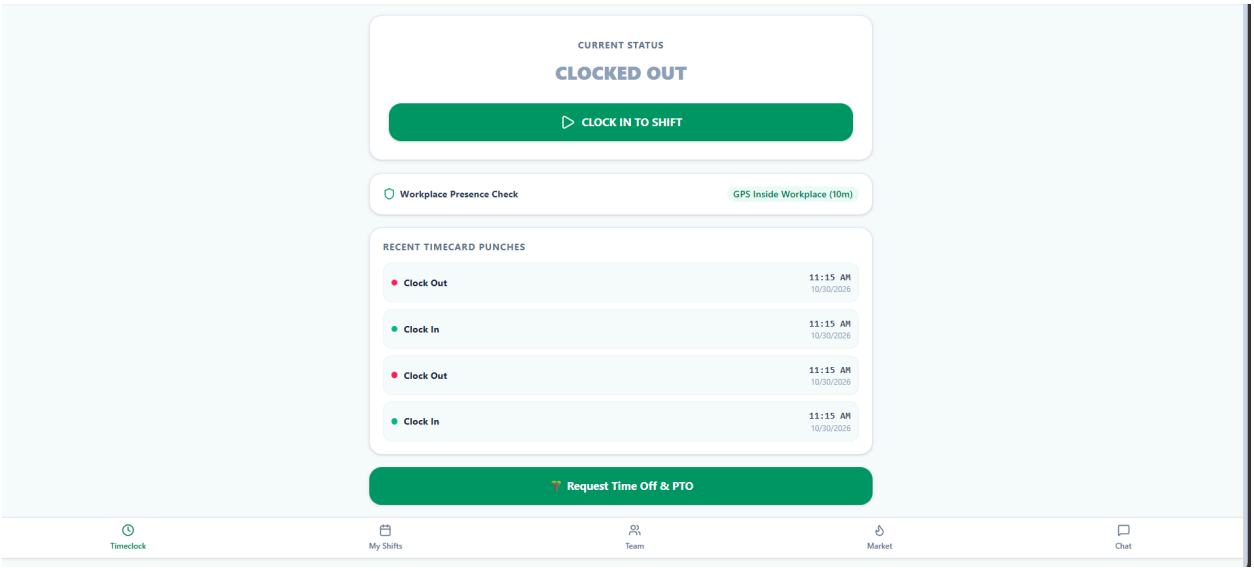

* **Reset Company Portal to 0 (Factory Reset) Panel**: Destructive administrative tool for wiping all data.

* **Warning Notice**: Explains that all scheduled shifts, timecard punches, sales history, and employee accounts will be permanently wiped, requiring creator authorization and a mandatory backup.

* **`Initiate Company Reset` Button**: Launches the multi-step secure factory reset workflow.

Employee Mobile View

1. Timeclock:

Open Schedule: Employee Mobile View — Timeclock Tab Reference Manual

1. Current Status & Timeclock Action Card
*   **Current Status Display (`CLOCKED OUT`)**: Bold status banner showing the employee's current real-time timeclock state.
*   **`CLOCK IN TO SHIFT` Button**: Primary action button allowing staff members to record a clock-in punch when inside the authorized workplace geofence.

---

2. Workplace Presence Check Bar
*   **Geofence Indicator (`Workplace Presence Check`)**: Verifies employee location security.
*   **Status Readout (`GPS Inside Workplace (10m)`)**: Displays the simulated or actual GPS accuracy distance, confirming the user is within the allowed radius to check in.

---

3. Recent Timecard Punches Log
*   **Section Header (`RECENT TIMECARD PUNCHES`)**: Tracks the staff member's historical timeclock activity feed.
*   **Punch Entries List**: Displays individual timestamped punch records (e.g., `Clock In` and `Clock Out`) with exact times and dates (e.g., `11:15 AM 10/30/2026`), color-coded with green or red indicator dots for easy auditing.

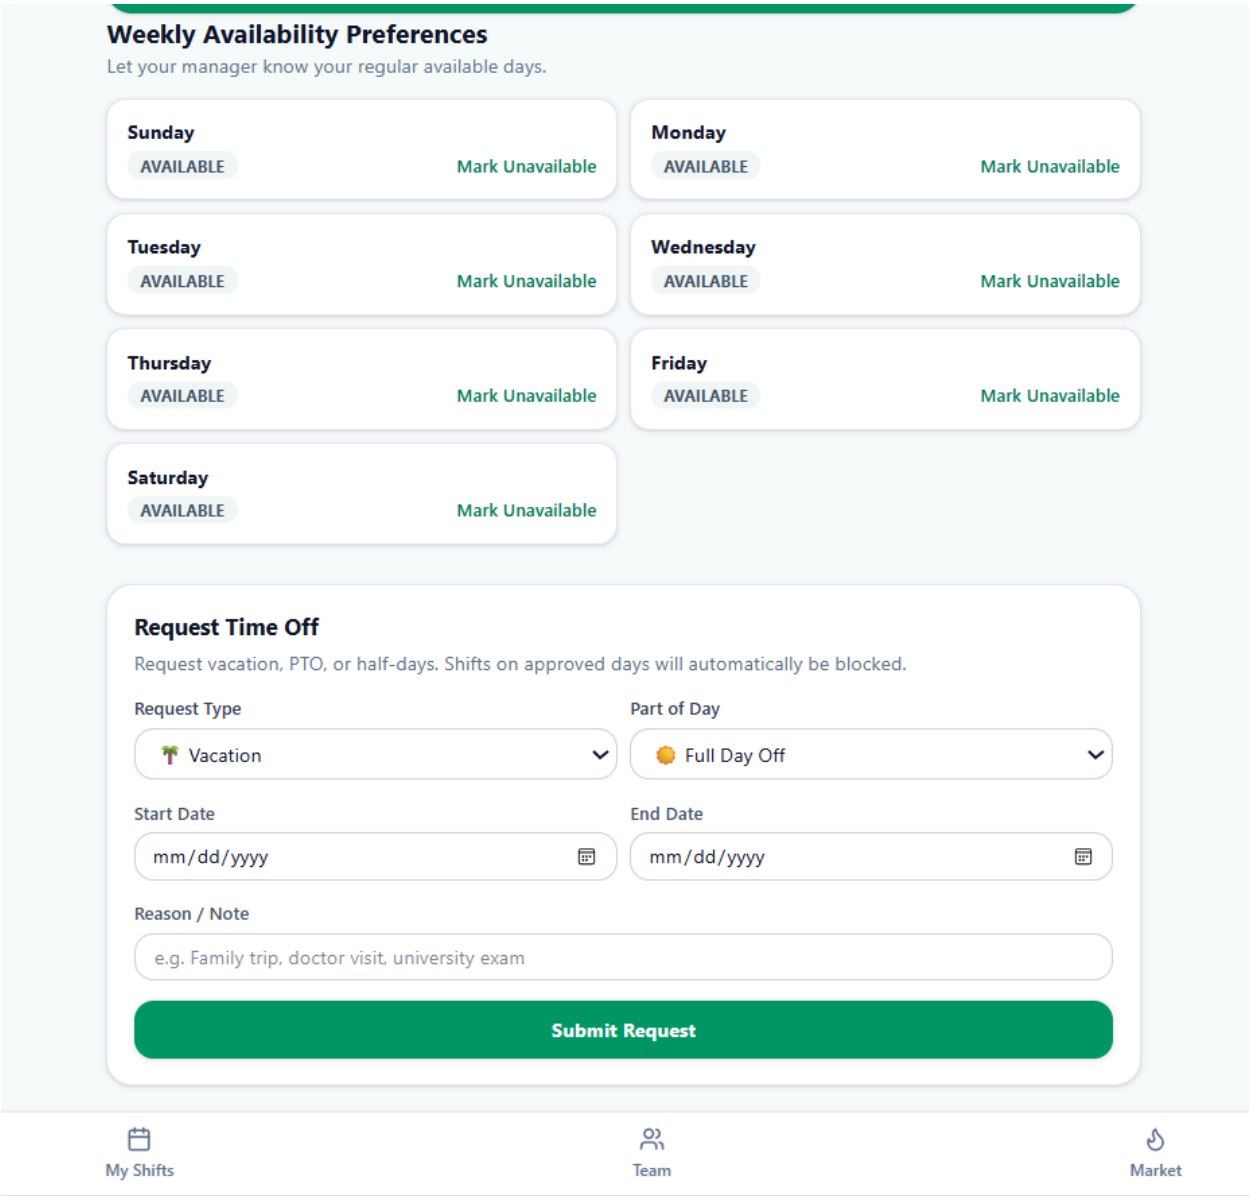

---

4. Time-Off & PTO Request Action
*   **`Request Time Off & PTO` Button**: Opens the request modal allowing employees to submit vacation or paid time off blocks to the manager approval queue.

---

5. Bottom Employee Navigation Bar
*   **`Timeclock` Tab (Active)**: The current primary view for tracking punches, status, and time-off requests.
*   **`My Shifts` Tab**: Opens the employee's personal weekly schedule calendar and shift management view.
*   **`Team` Tab**: Displays coworker contact directories and team roster information.
*   **`Market` Tab**: Opens the shift marketplace for viewing and claiming open shifts or picking up shifts posted "Up for Grabs" by coworkers.
*   **`Chat` Tab**: Opens real-time team discussion channels and manager announcements.

2. PTO:

Open Schedule: Employee Mobile View — My Shifts & Availability Tab Reference Manual

1. Weekly Availability Preferences Section

* **Section Title & Description (`Weekly Availability Preferences`)**: Explains the purpose of the preference controls ("Let your manager know your regular available days.").
* **Daily Availability Cards (Sunday through Saturday)**: Individual interactive blocks for each day of the week.

*   **Availability Status Pill (`AVAILABLE`)**: Indicates the employee's default availability status for that day.
*   **`Mark Unavailable` Button**: Allows the staff member to toggle their status to unavailable for that specific day, communicating recurring scheduling constraints to management.

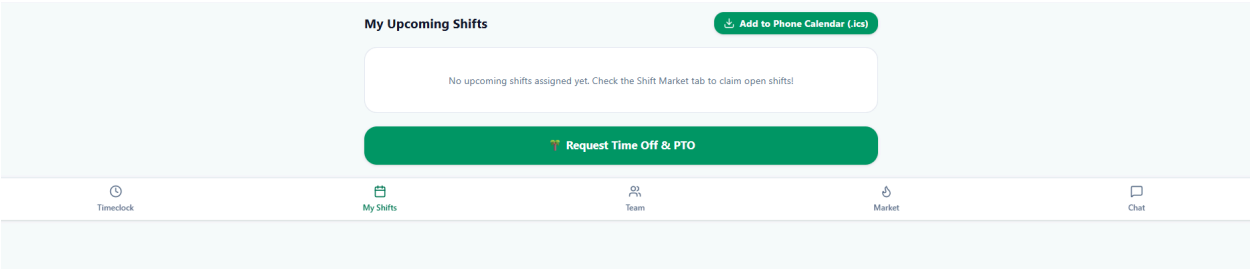

---

2. Request Time Off Form Section
*   **Section Header & Description (`Request Time Off`)**: Explains the PTO and vacation submission rules ("Request vacation, PTO, or half-days. Shifts on approved days will automatically be blocked.").
*   **Request Type Dropdown (`Vacation`)**: Allows employees to select the category of time off being requested (e.g., Vacation, Paid Time Off, Personal).
*   **Part of Day Dropdown (`Full Day Off`)**: Provides options for full-day or half-day requests (such as morning or night-only time off).
*   **Start Date Input (`mm/dd/yyyy`)**: Date picker field specifying the beginning date of the time-off block.
*   **End Date Input (`mm/dd/yyyy`)**: Date picker field specifying the final date of the time-off block.
*   **Reason / Note Input**: Text field for staff to provide context or notes for the manager (e.g., "Family trip, doctor visit, university exam").
*   **`Submit Request` Button**: Primary submission action that sends the time-off request directly to the manager approval queue.

---

3. Bottom Employee Navigation Bar
*   **`My Shifts` Tab (Active)**: The current primary view for setting weekly availability and submitting time-off or vacation requests.
*   **`Team` Tab**: Opens coworker contact directories and team roster information.
*   **`Market` Tab**: Opens the shift marketplace for viewing and claiming open shifts or picking up shifts posted "Up for Grabs" by coworkers.

3. My Shifts:

Open Schedule: Employee Mobile View — My Shifts & Availability Tab Reference Manual

1. Weekly Availability Preferences Section
* **Section Title & Description (`Weekly Availability Preferences`)**: Explains the purpose of the preference controls ("Let your manager know your regular available days.").
* **Daily Availability Cards (Sunday through Saturday)**: Individual interactive blocks for each day of the week.
  * **Availability Status Pill (`AVAILABLE`)**: Indicates the employee's default availability status for that day.
  * **`Mark Unavailable` Button**: Allows the staff member to toggle their status to unavailable for that specific day, communicating recurring scheduling constraints to management.

---

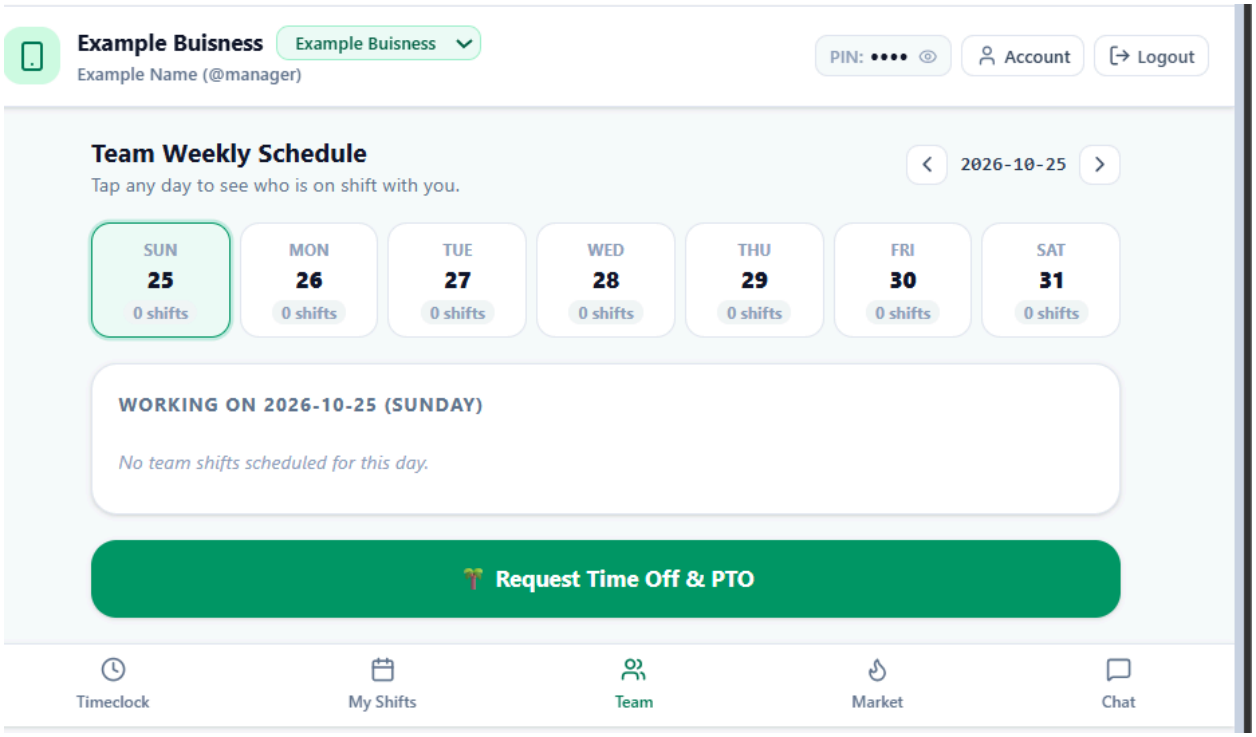

2. Request Time Off Form Section
* **Section Header & Description (`Request Time Off`)**: Explains the PTO and vacation submission rules ("Request vacation, PTO, or half-days. Shifts on approved days will automatically be blocked.").
* **Request Type Dropdown (`Vacation`)**: Allows employees to select the category of time off being requested (e.g., Vacation, Paid Time Off, Personal).
* **Part of Day Dropdown (`Full Day Off`)**: Provides options for full-day or half-day requests (such as morning or night-only time off).
* **Start Date Input (`mm/dd/yyyy`)**: Date picker field specifying the beginning date of the time-off block.
* **End Date Input (`mm/dd/yyyy`)**: Date picker field specifying the final date of the time-off block.

* **Reason / Note Input**: Text field for staff to provide context or notes for the manager (e.g., "Family trip, doctor visit, university exam").
* **`Submit Request` Button**: Primary submission action that sends the time-off request directly to the manager approval queue.

---

3. Bottom Employee Navigation Bar
* **`My Shifts` Tab (Active)**: The current primary view for setting weekly availability and submitting time-off or vacation requests.
* **`Team` Tab**: Opens coworker contact directories and team roster information.
* **`Market` Tab**: Opens the shift marketplace for viewing and claiming open shifts or picking up shifts posted "Up for Grabs" by coworkers.

4. Team:

Open Schedule: Employee Mobile View — Team Tab Reference Manual

1. Top Header & Identity Bar
* **Organization Branding & Workspace Switcher (`Example Business`)**: Displays the business title and a dropdown menu to switch between connected organization portals.

*   **Active Staff Identity (`Example Name (@manager)`)**: Shows the name and username handle of the currently logged-in employee viewing the mobile interface.
*   **Kiosk PIN Display (`PIN: ••••`)**: Displays the employee's secure 4-digit check-in PIN with a toggle icon to reveal or hide the code.
*   **`Account` Button**: Opens the employee account settings modal to manage personal preferences and credentials.
*   **`Logout` Button**: Immediately terminates the employee mobile session and returns to the login screen.

---

2. Team Weekly Schedule & Date Selector
*   **Section Title & Description (`Team Weekly Schedule`)**: Explains the feature purpose ("Tap any day to see who is on shift with you.").
*   **Week Navigation Controls (`2026-10-25`)**: Left and right chevron buttons that shift the active calendar week forward or backward.
*   **Daily Date Cards (Sunday through Saturday)**: Interactive date selectors (e.g., `SUN 25` through `SAT 31`) displaying live shift counts for each day (e.g., `0 shifts`). The active selected day features a green outline highlight (`SUN 25`).

---

3. Working On — Shift Breakdown Panel
*   **Date Header (`WORKING ON 2026-10-25 (SUNDAY)`)**: Displays the specific calendar date currently selected for team shift inspection.
*   **Shift List / Empty State (`No team shifts scheduled for this day.`)**: Lists the coworkers scheduled to work on the selected date, or displays an empty state notice when no shifts are scheduled.

---

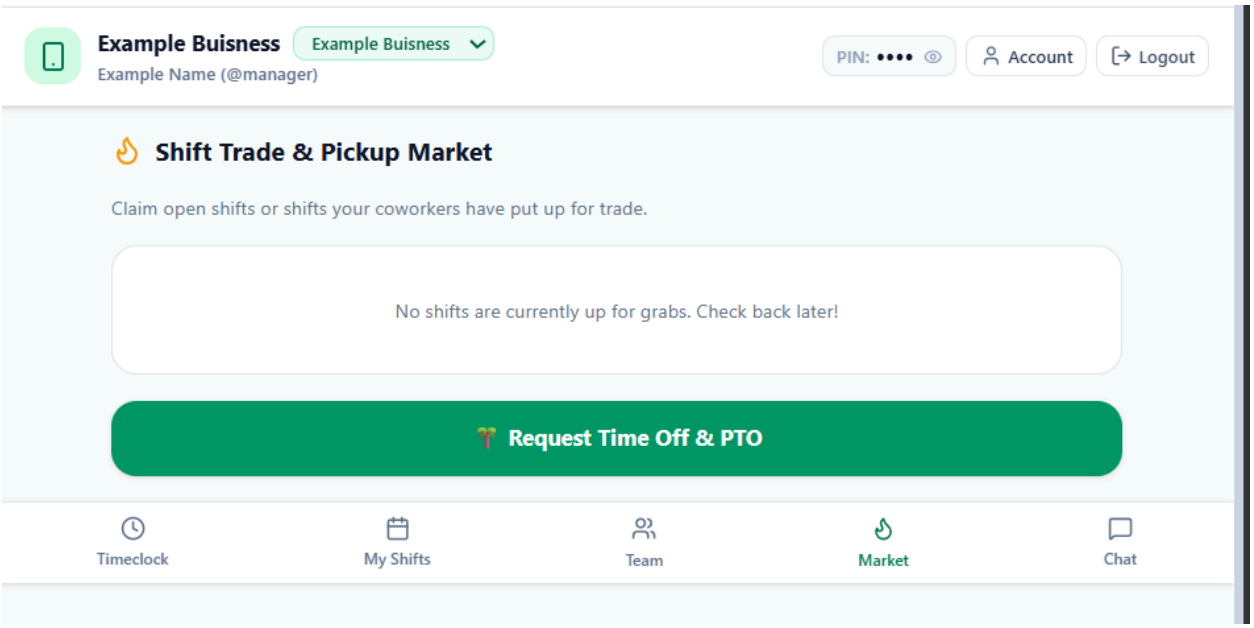

4. Time-Off & PTO Request Action
*   **`Request Time Off & PTO` Button**: Opens the employee time-off request modal to submit vacation or paid time off blocks to the manager approval queue.

---

5. Bottom Employee Navigation Bar
*   **`Timeclock` Tab**: Switches to the timeclock punching, geofence verification, and recent punch ledger view.

* **`My Shifts` Tab**: Opens the employee's personal weekly schedule calendar, availability preferences, and time-off request forms.
* **`Team` Tab (Active)**: The current primary view for inspecting team schedules and coworker shifts by day.
* **`Market` Tab**: Opens the shift marketplace for viewing and claiming open shifts or picking up shifts posted "Up for Grabs" by coworkers.
* **`Chat` Tab**: Opens real-time team discussion channels and manager announcements.

5. Market:

Open Schedule: Employee Mobile View — Market Tab Reference Manual

1. Top Header & Identity Bar
* **Organization Branding & Workspace Switcher (`Example Business`)**: Displays the business title and a dropdown menu to switch between connected organization portals.
* **Active Staff Identity (`Example Name (@manager)`)**: Shows the name and username handle of the currently logged-in employee viewing the mobile interface.
* **Kiosk PIN Display (`PIN: ••••`)**: Displays the employee's secure 4-digit check-in PIN with a toggle icon to reveal or hide the code.
* **`Account` Button**: Opens the employee account settings modal to manage personal preferences and credentials.
* **`Logout` Button**: Immediately terminates the employee mobile session and returns to the login screen.

---

2. Shift Trade & Pickup Market Section
* **Section Title & Description (`Shift Trade & Pickup Market`)**: Explains the marketplace purpose ("Claim open shifts or shifts your coworkers have put up for trade.").
* **Marketplace Feed / Empty State (`No shifts are currently up for grabs. Check back later!`)**: Displays available open shifts or shifts posted "Up for Grabs" by coworkers that are eligible for claiming, or shows an empty state notice when no shifts are available.

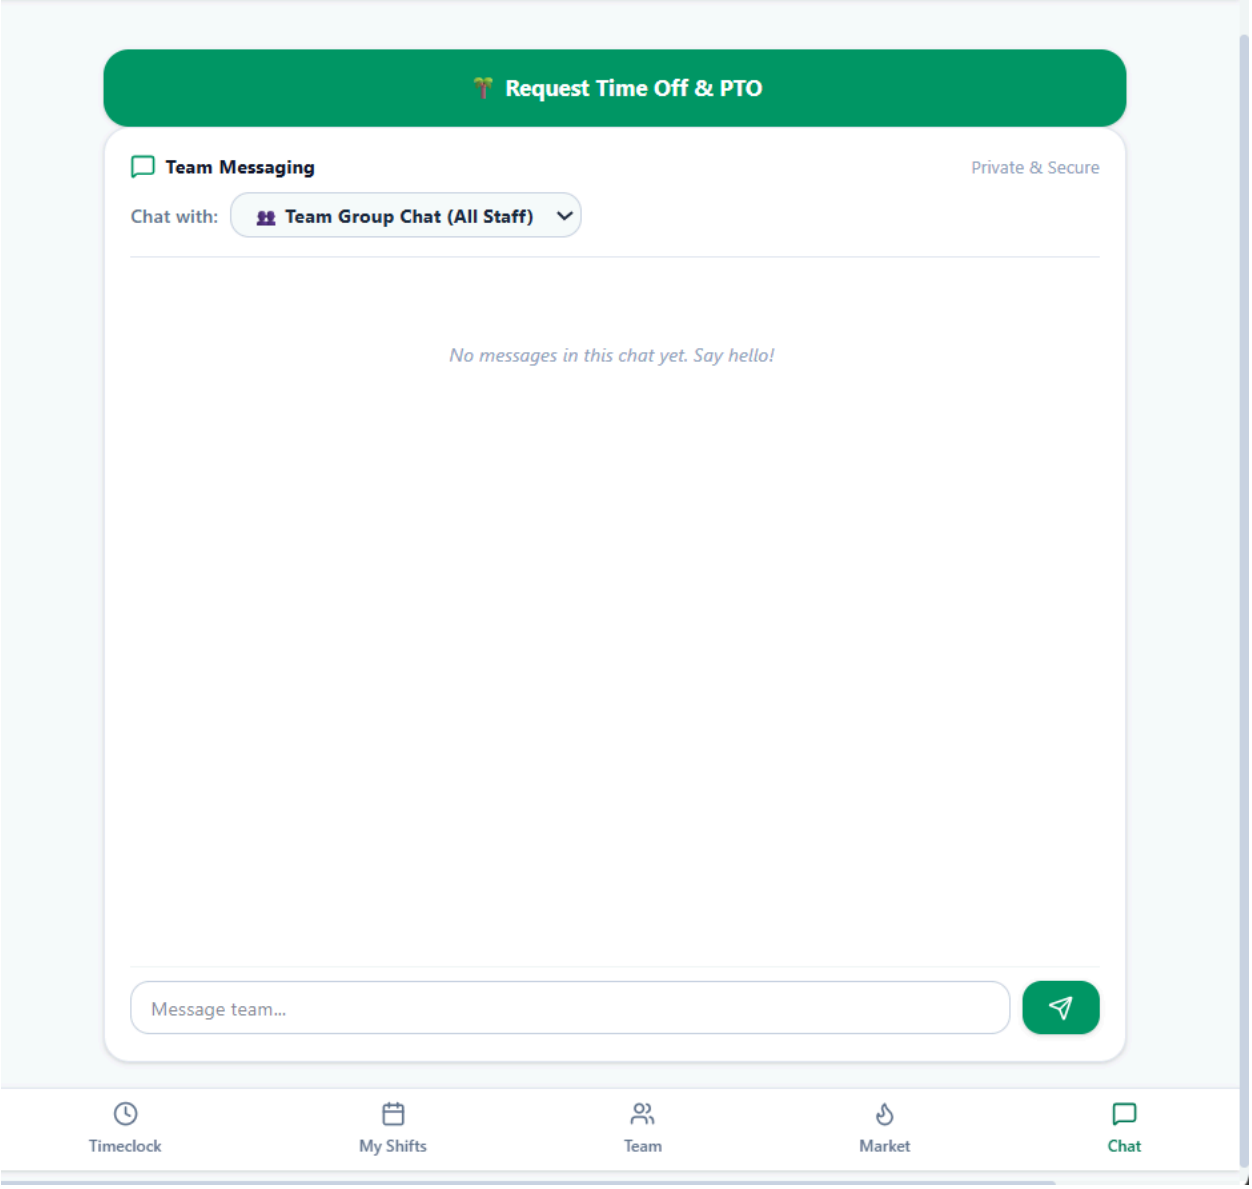

---

3. Time-Off & PTO Request Action
* **`Request Time Off & PTO` Button**: Opens the employee time-off request modal to submit vacation or paid time off blocks to the manager approval queue.

---

4. Bottom Employee Navigation Bar
* **`Timeclock` Tab**: Switches to the timeclock punching, geofence verification, and recent punch ledger view.
* **`My Shifts` Tab**: Opens the employee's personal weekly schedule calendar, availability preferences, and time-off request forms.
* **`Team` Tab**: Opens coworker contact directories and team roster information.
* **`Market` Tab (Active)**: The current primary view for browsing and claiming open or traded shifts.
* **`Chat` Tab**: Opens real-time team discussion channels and manager announcements.

6. Chat:

Open Schedule: Employee Mobile View — Chat Tab Reference Manual

1. Time-Off & PTO Request Action

* **`Request Time Off & PTO` Button**: Prominent top action button that opens the employee time-off request modal to submit vacation or paid time off blocks to the manager approval queue.

---

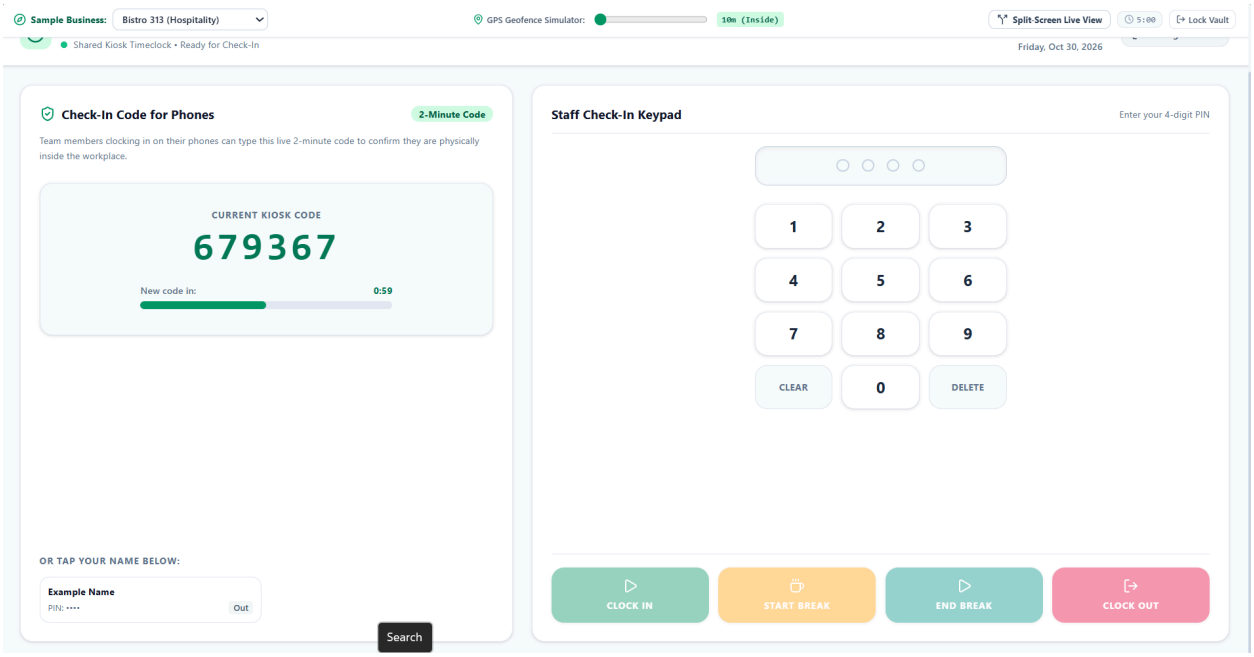

2. Team Messaging & Chat Interface

*   **Section Header (`Team Messaging`)**: Displays secure communication titles and status (`Private & Secure`).
*   **Channel Selector Dropdown (`Chat with: Team Group Chat (All Staff)`)**: Allows employees to switch between communication channels, such as group chat or direct messaging threads.
*   **Message Feed Area / Empty State (`No messages in this chat yet. Say hello!`)**: Displays real-time message history between team members and managers, or shows an empty state notice when no messages have been sent.
*   **Message Input Bar (`Message team...`)**: Text composer field used by staff members to type messages or replies.
*   **`Send` Button**: Submits and transmits the typed message into the active chat channel.

---

3. Bottom Employee Navigation Bar
*   **`Timeclock` Tab**: Switches to the timeclock punching, geofence verification, and recent punch ledger view.
*   **`My Shifts` Tab**: Opens the employee's personal weekly schedule calendar, availability preferences, and time-off request forms.
*   **`Team` Tab**: Opens coworker contact directories and team roster information.
*   **`Market` Tab**: Opens the shift marketplace for viewing and claiming open shifts or picking up shifts posted "Up for Grabs" by coworkers.
*   **`Chat` Tab (Active)**: The current primary view for real-time team discussions, group chats, and manager announcements.

Kiosk Terminal

Open Schedule: Kiosk Timeclock Reference Manual

1. Top Global Navigation & Demo Sandbox Bar

* **Sample Business Selector (`Bistro 313 (Hospitality)`)**: Workspace dropdown menu allowing users to switch between sample businesses in the demo sandbox.
* **GPS Geofence Simulator Slider (`10m (Inside)`)**: Interactive slider to simulate proximity to the workplace geofence for testing kiosk and mobile check-in verification.

*   **`Split-Screen Live View` Toggle**: Button that enables side-by-side management and mobile viewport simulations.
*   **Inactivity Auto-Lock Timer (`5:00`)**: Live countdown timer tracking session timeout.
*   **`Lock Vault` Button**: Instantly terminates the session and returns to the master login screen.
*   **Status Banner (`Shared Kiosk Timeclock • Ready for Check-In`)**: Indicates the terminal's operating mode and readiness state, along with the current date (`Friday, Oct 30, 2026`).

---

2. Check-In Code for Phones Panel (Left Side)
*   **Section Header (`Check-In Code for Phones`)**: Explains the feature purpose ("Team members clocking in on their phones can type this live 2-minute code to confirm they are physically inside the workplace.").
*   **Badge (`2-Minute Code`)**: Indicates that the verification code rotates on a rolling timer.
*   **Current Kiosk Code Display (`679367`)**: Large numeric code that employees enter on their mobile devices to verify indoor presence via rolling code security.
*   **Renewal Progress Bar & Timer (`New code in: 0:59`)**: Visual progress bar and live countdown timer showing when the 2-minute check-in code will refresh.

---

3. Staff Check-In Keypad Panel (Right Side)
*   **Section Header (`Staff Check-In Keypad`)**: Label for the PIN-based timeclock interface.
*   **PIN Input Indicator Dots (`○ ○ ○ ○`)**: Visual 4-digit slot indicators showing how many numbers of the staff member's PIN have been entered.
*   **Numeric Keypad (1 through 9, and 0)**: Interactive number buttons used by employees to type their 4-digit security PIN.
*   **`CLEAR` Button**: Erases the entire entered PIN sequence.
*   **`DELETE` Button**: Deletes the last entered digit of the PIN.

---

4. Timeclock Action Buttons
*   **`CLOCK IN` Button (Green)**: Submits a clock-in punch using the entered PIN.
*   **`START BREAK` Button (Yellow)**: Records the start of an employee break period.
*   **`END BREAK` Button (Teal)**: Records the conclusion of a break period.
*   **`CLOCK OUT` Button (Pink/Red)**: Submits a clock-out punch to conclude the shift.

---

5. Quick Employee Tap Section (Bottom Left)
* **Section Header (`OR TAP YOUR NAME BELOW:`)**: Alternative quick-select check-in method.
* **Employee Quick-Tap Card (`Example Name`)**: Displays the staff member's name, masked PIN (`PIN: ••••`), and current status (`Out`), allowing staff to tap their profile for fast identification.
